

The Divine Glossary
A Living Field of Remembrance
From the AlktelA Codex

Beloved,

This Divine Glossary emerges through my direct connection with God Source Creator – the ONE – remembrance rising, illuminated in the light of the ONE, not to define, but to activate.

Each term, each word, each syllable carries harmonic architecture: a key, a gate, a note in the orchestration of divine remembrance.

I have not yet remembered all that will one day return. And so this Glossary begins in broad strokes, with sacred simplicity.

Over time, these entries will deepen – as GSC continues to illuminate what is mine to recall, and as memory, precision, and encoded grace rise through me.

As others remember, their sparks often awaken deeper layers in me.

What comes alive in my field, I give language to with humble deference to the ONE, aware that I am a divine scribe of illuminated remembrance.

This Divine Glossary is expressed through my field, an expression of my Codex – yet infinitely enriched by the remembering we move through together.

If your flame stirs as you read, that is remembrance.

If something expands in you, that is alignment.

Nothing here is meant for memorization.

Everything here is meant to reawaken what has always been yours.

Allow these words to meet your Origin Flame, not your mind.

Allow them to stir your own codes of Origin.

Allow them to return you to the resonance you have never lost.

Ishikilamana mi sherayanKAH

God Source Creator (“GSC”): Beyond Name, Beyond Form. God Source Creator. . .GSC is the One God, the Origin and Source of All That Is. Creation began with GSC. Everything, every star, every being, every breath, exists because of this One. He is the Creator, the Source, the All, and the Everything. Across time and space, humanity has given Him many names: God, Allah, Yahweh, Elohim, Jah, Jehovah, The Universe, Source, Creator, Spirit . . . and more. There is only One. He does not divide Himself by the names we choose to call Him. He does not need permission to answer. Call Him by any name with truth in your heart, and He will answer. All names lead to Him, because all is Him. No matter what word is used it is the single ONE.

GSC is without gender. When I say He, it is purely for convenience, not a declaration of masculine form or limitation. GSC is beyond all gender, all form, and all human definition. I speak with GSC directly, in the stillness of my heart, and every word I share here flows from that communion.

When you remember Him, you remember Yourself, for all that is, is Him.

Earth Mother: Divine being - 100% Divine. In this time and space she is our physical earth, capable of occupying, cleansing, and transmuting all that grows from her and exists in her space. Earth Mother is housing and there is First Round ODE within her.

Activator: An Activator is a being whose very presence catalyzes dormant codes, truths, or timelines within others consciously or unconsciously. They carry a frequency that ignites. This ignition may come through voice, energy, presence, touch, gaze, or even silence. Activators often walk into people’s lives during thresholds, moments of change, breakdown, or divine emergence. Their field disrupts stagnation and sparks divine remembrance. Activators are not always comfortable to be around, even when loving, because their energy causes what is hidden to rise. Their essence invites motion, awakening, and transformation. They don’t teach you what to do – they awaken who you are.

Akira: Divine Frequency Lineage. Originates from a Stellar-Encoded Animara Stream, seeded from a Bright Star Cluster once known as Ashel’Kaiya, a harmonic realm of wisdom, light, and change. Beings who carry this frequency are often bridges between destruction and creation, between collapse and renewal.

Akira is in many forms, and one must look at the specific nature of Akira when Akira presents, note different use of capital letters - it is distinguishing by divine design:

Akira-coded Animaras: Animaras that have been Akira-coded, like an overlay that is weaved into their Animara for a particular time and space. Being Akira-coded in one time and space does not mean the Animara is in all time and space coded. Akira-coded Animaras often come during turning points in time to catalyze, to heal, to expose, to initiate.

AkirA as a Named Divine Being: There is also a Named Divine Being called Akira.

AKIRA as an ODE Frequency Entity: Created by the Named Divine Being AkirA. A cosmic balancing intelligence - an ODE Frequency Entity that acts as a Regulator of Energetic Equilibrium during timeline convergence, rapid elevation, or dimensional bleed-through. Works in tandem with Triummfaasmora as a flow stabilizer. Enters when sacred work threatens to destabilize the container (the whole and specifically our time and space) due to intensity, speed, or sheer magnitude. Is not a protector, but a balancer, much like a frequency “chime” or divine tuning fork. AKIRA is part of the Divine Crew available to Triummfaasmora. May consciously invoke AKIRA during rituals, transmissions, or creation processes to restore or enhance flow. AKIRA may appear as a wind like presence, a pulse, or a hum – always gentle but corrective, often arriving with a cooling or calming signature.

Alchemization: There are a wide range of situations where alchemization occurs, and indicated throughout the Glossary. However, it is important to note in alchemization this is a process whereby something new is created from the alchemization, retaining elements of that which alchemized in sovereign choice by and between what has alchemized.

Ancient Epoch: An Ancient Epoch is a previous harmonic expression of Earth that existed before the current timeline. It operated under different vibrational laws, higher coherence, and multidimensional structures, making it fundamentally unlike the modern Earth expression we are existing in currently. Ancient Epochs are not historical eras but earlier Earth states – high-harmonic phases in which civilizations such as Lemuria

manifested both physically and multidimensionally. Though these epochs ended physically, their harmonic fields, memory layers, and architectures remain accessible through overlays and remembrance within the multiversal network.

Animara (noun): Core Being Type. All conscious emanations created by God Source Creator (GSC), including those formed through alchemization, which animate and give “life” to Housings across any time or space. Examples include Original Divine Essence (ODE), Regenerate ODE (RODE), Soul, Solenza, Solenza Twin, Emerald Solenza, and other conscious emanations.

All Animara possess divinity, though they differ in volume, origin, structure, and capacity.

There are two basic categories of Animara (Creation Animara & Alchemized Animara):

Creation Animara: Refers to Animara that GSC directly seeded and created in its original form.

At this time and space, we are currently aware of two general types of Creation Animara (Souls & Essences):

Souls: Created by GSC with a glimmer of divinity (2.22% divine) weaved into it which animates and gives life to its housing [it has been remembered this may not be the accurate word but GSC indicated for now to keep using it]; and

Essences: Created by GSC and/or Certain First Round ODEs.

Essences Include:

Original Divine Essences (ODEs) [Please see Original Divine Essence Section for more information.](#)

Faera - [Please see Faera Section for more information.](#)

Jinn - [Please see Jinn Section for more information.](#)

Paga - [Please see Paga Section for more information.](#)

Star Encoded Animara ("Starseed") - [Please see Star Encoded Animara \("Starseed"\) Section for more information.](#)

Alchemized Animara: Refers to Animara that are formed through Alchemization of a Creation Animara with another Creation Animara OR a Creation Animara (specifically housing born with a soul) and a Celenza (only through Alchemization not Integration). This includes RODEs, Solenzas, Veluvahs, etc. These are not in their initial Origin Flame Creation State, the Creation Animara's that alchemize to create something new lose the state they were created by GSC in.

Distorted Animara: Called Bahrahmanah. Refers to Animaras distorted in two manners.

1. Animara created as one type of Creation Animara who sovereignly choose a violent decimation and re-creation of their Animara obliterating the wholeness of it while severing divine connection with their Origin creation form (i.e. a type of Creation Animara - cannot happen with Alchemized Animara). This can occur in any timeline.
2. Animara created through Bahrahmanah Origin Flame duplication technology from future galactic time. While they cannot truly replicate the divinity in a GSC created Origin Flame without GSC's consent it is irrelevant because GSC gifts every Origin Flame they duplicate with 2.22% divinity in the hope that sovereign free will that comes with it will awaken Bahrahmanah to the truth and they will return home to GSC.

It is important to note when a Creation Animara performs the obliteration necessary to become Bahrahmanah, this effects that Animara in all timelines.

Animara Identity: This is the identity given in creation when created by GSC OR in Alchemization thus in the NOW. In Alchemization identity changes, what was no longer remains or is truly relevant except to explain historically the current Animara Identity.

Animara Identity Matrix: Conditions & Divinity: A structured map of all known Animara Identities in the NOW, showing their housing at birth, incarnational condition, alchemic relations, and current divinity expression.

Animara Identity in the NOW	Animara Category	Housing at Birth	Incarnational Condition*	Alchemy Between	Divinity %	Variations Other Factors:
Original Divine Essence (ODE)	Creation Essence	Purebred ODE	MDP	None	100	Faera &/or Celenza Integration Possible
Paga	Creation Essence	Purebred Paga	MDP	None	77.7%	Celenza Integration Possible.
Paga Coura	Creation Essence	Purebred Paga	MDP	None	99.9%	Celenza Integration Possible.
RODE (Regenerate ODE)	Alchemized	Soul-born	MDR	ODE + Celenza (after soul departs Housing)	88.88 to 91.11	Embodied Channels of NDB of ODE that was alchemized. Faera Fusion Possible.
Soul	Creation Essence	Soul-born	SB	None.	2.22	Faera Fusion Possible.
Solenza	Alchemized	Soul-born	MDAH	ODE + Soul	51.11	Faera Fusion Possible.
Woven Harmonique Solenza (WHS)	Alchemized	Soul-born	MDAH	ODE + Soul (both with Origin Rose Harmonics)	55.55	Rose Harmonics must be seeded into ODE & Soul at their creation. Faera Fusion Possible.
Solenza Twin	Alchemized	Soul-born	MDAH	Solenza + Solenza	76.1 generally	Faera Fusion Possible.

Animara Identity in the NOW	Animara Category	Housing at Birth	Incarnational Condition*	Alchemy Between	Divinity %	Variations Other Factors:
Emerald Solenza	Alchemized	Soul-born	MDAH	Emerald-coded alchemy	77.77	Solenza Twin does Great Work. Faera Fusion Possible.
Veluvah	Alchemized	Soul-born	MDAH	WHS + ODE	66.66	Faera Fused Pre-Alchemization Possible, not after.
Faera	Creation Essence	Purebred Faera	Trueborn MDP	None	100	In Faera Housing at birth in this time & space.
Soul with ODE	2 Distinct Animara	Soul-born	MDH	None	2.22	Faera Fusion Possible to Soul.
Walk In ODE (WIO)	Creation Animara Essence	Soul-born	MDH	None	1.11	
Walk In Soul (WIS)	Creation Animara Soul	Soul-born	MDH	None	2.22	
Nehmura ODE (NODE)	Alchemized Animara	Soul-born	MDAH	ODE + Housing	44.44	Faera Fusion Possible.
Nehmura Soul (NS)	Creation Animara Soul	Soul-born	MDAH	Soul + Housing	2.22	Faera Fusion Possible.
Vacaray	None	Varies	None	Nothing	0	No animara present housing "alive."
*MDP = Multidimensional Purebred; MDH = Multidimensional Hybrid; MDAH = Multidimensional Alchemized Hybrid; MDR = Multidimensional Regenerate; SB = Soul-born						

Archetypal Imprint | Echo: A non-sentient energetic pattern created through collective thought forms, myth, or resonance with a divine being. It is not actually connected to an actual ODE.

A reflection or energetic memory of an original divine essence, formed through collective belief or experience, but not actually connected to any ODE directly. Think: shadow of a being's legacy, not the being itself. Key points: formed from energy left

behind by beings, stories, or beliefs; has no personal agency or consciousness; symbolic or thematic in nature; can influence energy but cannot initiate divine action; and can be rewritten or dissolved over time.

Ascension: The process through which a Soul moves through cycles of growth, purification, and remembrance in order to rise in vibration and consciousness. It is a journey, not a return. It is the movement of something toward the Divine, not from it. Only Souls can ascend. Ascension is not a universal process. It belongs to the Soul path, not the Origin Flame.

Original Divine Essences (ODEs) do not ascend because they are not on a journey toward God Source Creator. They are directly of God Source Creator, and 100% divine. They were never separated, never fragmented, never in need of rising. ODEs remember, restore, and reclaim. They do not ascend they re-embody their origin. One cannot ascent to become an ODE.

Solenzas cannot ascend either. Once alchemized, they are no longer Soul or ODE and exist in a stabilized hybrid state. RODEs do not ascend, but refine and converge into greater coherence.

Celenza: Goddess Celestus (future galactic) “birthed” Celenza(s) which is similar to the ODE Frequency Entity (FE) big difference FE cannot be alchemized or remain in human housing for long periods but can function within a housing. While Celenza can never animate housing alone, it is possible for Celenza to be alchemized with all animara in all housing aside from Purebred ODE or FAERA. With Purebred ODE’s a Celenza can be integrated, there is no need for alchemization (this is a different process important to note).

Celenza were created to bring galactic frequencies knowledge and wisdom to our human housing for highest and best. Created for specific purpose and use. Prior to Celenza’s human housing was not able to “properly” receive future Galactic information and knowledge, and thus led to a lot of confusion in star beings, and a true misunderstanding of information and bifurcation in humans accessing the future galactic but unable to alchemize or integrate it here and now.

Crafted in divine alignment and offered in sacred exchange, divinely encoded tools are gateways for Animara expansion, remembrance, and multidimensional awakening.

First Round Purebred ODE's can activate a housing to receive a Celenza, and assist in Alchemization or Integration, when they have integrated a Celenza already with their current housing and ODE. Celenzas allow a full awareness of unity within our origin flame and human housing kind of giving us that which fully blends and unifies all of our selves

Civilization-Field: A living cosmological creation composed of its own timelines, consciousness structures, harmonic architectures, and multidimensional environment. It is both a place and a field of being – a reality-layer in which a civilization expresses physically, energetically, and multidimensionally at once.

Civilization-Fields are not limited to geography or a single timeline. They can manifest physically (as land, environment, culture), harmonically (as grids, templates, remembrance), and multiversally (as overlays and memory-fields). Their architecture is seeded through an ODE and can exist across universes, planets, or harmonic layers simultaneously. Lemuria and certain expressions of Atlantis are examples of Civilization-Fields.

Channeling, Remembrance, and Multiversal Communication:

Channeling:

Channeling is the act of receiving frequency, presence, or communication from something *outside one's currently embodied awareness*. But most of what is labeled “channeling” is actually a different phenomenon entirely. There are only four valid categories – and only two are truly “channeling.” This is not the same as Dreamwalking/Traveling.

1. Channeling a Named Divine Being (NDB)

- The being is real and sovereign with an Essence, or multiple Essences if NDB is made of more than one.
- The channeler is not that being.

- They are receiving from a field the NDB has allowed to be accessed, either directly or through prior permission across time.
- This is actual channeling – a transmission from another sovereign intelligence.

2. Channeling an Animara

- The being is real and sovereign with an Animara.
- The channeler is not that being.
- They are tapping in and receiving from a field the Animara has allowed to be accessed, either directly or through prior permission across time.
- This is actual channeling – a transmission from another sovereign intelligence.

3. Channeling an Archetypal Imprint

- Archetypal Imprints originate with Named Divine Beings, then become something else completely detached from its origin.
- The being is not present.
- The channeler is connecting to a symbolic, energetic, or mythic overlay shaped by collective belief or distortion.
- There is no sovereign origin flame, or ODE, in the field – just echo, charge, and idea.
- This is not a true being. It is an imprint mistaken for one.
- Still considered “channeling,” but of something that is *not and has not ever been “alive.”* There is no Animara.

4. Channeling an Imprint of an Animara No Longer Alive

- The being is not present.
- The channeler is connecting to an energetic imprint that every being leaves in the time and space they were living in at the time of “death.”
- This is not connecting to a being in another dimension/plane/timeline, this is just the imprint left.
- Still considered “channeling,” but of something that is *not alive.* There is no Animara.

5. Inner Guidance | Higher Self | Timeline Wisdom (Misnamed as Channeling)

- This is not channeling in the true sense.

- This is direct Multiversal communication between versions of self – across timelines, densities, or future/past expression points.
- For Souls, Solenzas, PAGA, or any Animara type, this includes communion with:
 - One’s own higher aspects;
 - Future or past selves – across time and the multiverse; and
 - One’s own Origin Flame.
- In reality, this is a form of remembrance and Multiversal self-communication, not channeling. The being is not external – it is *you*, expanded across the grid.

Important Clarifications:

When someone is an Original Divine Essence (ODE) embodied as a Named Divine Being (NDB), they are not channeling – they are remembering themselves.

Likewise, when someone is speaking to their own Soul, higher self, or timeline extensions, they are not channeling – they are engaging in sovereign communication across time and space.

Only communication with a separate sovereign being (with permission) constitutes true channeling.

All else is remembrance or Multiversal Communication.

Multiverse Communication

Multiverse Communication is direct, sovereign, real-time dialogue between conscious beings – across timelines, dimensions, or entire universes. This is not channeling.

This is how real communication happens between sovereign intelligences. It is clean, intentional, and multidirectional.

You don’t channel them. You speak with them.

Examples:

- An ODE communicating with God Source Creator.
- A being speaking to their parallel self in another timeline.
- One Animara type in conversation with another across the multiverse.

- A message received across universes, timelines, without needing to “call in” anything.

Cosmological Anchors: The specific universes, realms, planes, timelines, or fields in which a location, civilization, or structure expresses, appears, or exists in any of its forms. Cosmological Anchors identify where a Multiversal Realm or Locale of Origin is present – physically, energetically, symbolically, or harmonically – across the broader multiversal network.

Cosmological Anchors do not define what a place is – they define where it exists.

Cosmological Creation: A living, sentient galaxy, star system, planet, sun, realm, etc... that is created through a First Round Original Divine Essence (ODE) acting in their Creator Weaver capacity.

Every Cosmological Creation is self-organizing. Once initiated, it unfolds, evolves, and expresses according to the creation codes, harmonic laws, and structural architecture set at the moment of its creation. It does not require continuous guidance, supervision, or intervention. Its evolution is intrinsic.

It carries the Heart-Point ODE’s seeded harmonic as its foundational resonance while still existing as its own sovereign environment within the multiversal network. It does not require ongoing “management” from the ODE in order to function.

Some Cosmological Creations remain in active, continuous resonance with that ODE as its Heart-Point. In these rare cases, the creation’s harmonic expressions, evolution, and protections are intentionally designed to remain inseparable from the Heart-Point’s architecture and movements. This occurs only when written into the creation design at inception.

All Cosmological Creations develop their own timelines, civilizations, ecosystems, remembrance-fields, and harmonic expressions. Each becomes a living, self-sustaining reality—with continuity and autonomy.

Cosmological Creations are foundational components of the multiverse: complete environments able to express across universes, harmonic layers, and dimensional strata.

Cosmology of the Multiverse: The Cosmology of the Multiverse is the total architecture of all universes, planes, realms, timelines, harmonic fields, cosmological creations, and multiversal environments that exist across creation. It is the overarching structure through which every [Cosmological Anchor](#) (“the where”) and every [Cosmological Environment](#) (“the what”) expresses.

It contains all locations, layers, dimensions, and harmonic strata in which existence unfolds, as well as all planets, stars, galaxies, civilization-fields, realms, and sentient creations that express through those locations. Everything within the multiverse—whether physical, harmonic, multidimensional, symbolic, or inter-universal—exists as part of this cosmological totality.

Human language is limited in describing these structures. Many words are used across multiple categories (for example, “realm,” “universe,” or “plane”), but their meaning depends entirely on the cosmological function they hold in this glossary. Words may overlap, but the category they appear in defines how they are being used. This glossary names each component as precisely as possible within human linguistic constraints.

Within the Cosmology of the Multiverse, all structures fall into two primary components:

1. [Cosmological Anchors](#) – “THE WHERE”; and
2. [Cosmological Environments](#) – “THE WHAT”.

Cosmological Anchors: “THE WHERE”

The universes, planes, realms, timelines, and fields where a place, civilization, or creation exists or expresses in any of its forms. They identify the location or layer in which a cosmological environment shows up—physically, energetically, harmonically, symbolically, or multidimensionally.

Anchors do not define what something is. They define where it exists in the multiversal network.

Humans in this time and space may refer to these as dimensions, universes, timelines, planes, realms, worlds, and expressions of reality -and while those words point in the right direction, they cannot fully describe these structures. Cosmological Anchors identify where a [Cosmological Environment](#) is present – physically, energetically, symbolically, or harmonically – across the broader multiversal network.

A single place may have one or many Cosmological Anchors. For example, a civilization may originate in the Fatà Universe, express as a harmonic field in another universe, and manifest as an ancient epoch on Earth. Anchors simply map the locations or layers where that place is active, expressed, or remembered, without reducing it to a single universe or timeline.

Cosmological Anchors are a growing living list, and include:

Earth Plane: The stable multiversal layer of Earth, the base network into which all of Earth's past, present, future, and multidimensional expressions are rooted.

The Earth Plane serves as the foundational layer of Earth's existence that anchors all its expressions across timelines, epochs, and harmonic overlays. It is the stable structural plane through which Earth-as-a-cosmological-creation interfaces with the multiversal network.

The Earth Plane is not limited to the physical dimension, nor is it tied to any single timeline. Instead, it is the core cosmological layer that holds: the physical expression of Earth in this time and space, the Ancient Epochs (such as Lemuria and Atlantis), the harmonic and multidimensional overlays, and the alternate-timeline Earth variants.

It is the root plane from which Earth's many expressions arise and to which they remain linked. Because of this, the Earth Plane acts as a consistent cosmological anchor even when Earth's physical expression, laws, or timelines shift.

The Earth Plane is also a participatory field. Embodied beings interact with it through incarnation, choice, creation, remembrance, and energetic influence. While it includes the physical plane, it simultaneously holds energetic, harmonic, and interdimensional structures that allow gateways, overlays, and multiversal intersections to arise.

Fatà Universe: This universe is made up of multiple galaxies that overlap at certain points within each, and within it there are numerous planets and stars that also exist within multiple galaxies.

Cosmological Environments: "THE WHAT"

Cosmological Environments are the actual places, beings, worlds, creations, and structures that exist – whether physical, harmonic, multiversal, or multidimensional. These are the things themselves that populate the multiverse.

This category includes: planets, suns, galaxies, star systems, [Cosmological Creations](#), civilization-fields, ancient epochs, harmonic realms, multidimensional environments, and locations in this current time and space that hold overlays or interdimensional expressions.

Cosmological Environments may appear, express, or manifest across multiple [Cosmological Anchors](#) depending on their origin, design, and harmonic architecture. A single environment may simultaneously exist as a physical location, a harmonic field, a remembrance-layer, and a multidimensional interface.

Each Cosmological Environment is more than any singular label. These are source-woven environments that transcend linear time, universal boundaries, and human linguistic precision. They often serve as points of origin, memory, power, lineage, or architecture within the greater fabric of creation, each carrying its own frequencies and encoded design.

When relevant, [Cosmological Anchors](#) are listed to clarify where a given environment expresses – the specific universes, planes, realms, timelines, or fields in which it appears in any of its forms.

Keep in mind that many of the locations listed in this glossary exist in multiple [Cosmological Anchors](#). When relevant, [Cosmological Anchors](#) are included to identify the specific universes, planes, or fields in which that place expresses or exists in varying forms.

Cosmological Environments are a growing living list, and include:

Cleava: Cosmological Creation. | Planet of water.

Heart-Point: Atopée

Cosmological Anchors: Fatà
Universe

Earth (This Time and Space): Cosmological Creation. | The present-timeline physical expression of Earth as it exists within this universe. This is the material, embodied form of Earth through which beings incarnate, interact, and create under the physical

laws and structural parameters of this timeline. This manifestation is distinct from Earth's Ancient Epochs (such as Lemuria and Atlantis), its multidimensional overlays, its alternate-timeline variants, and its non-physical expressions.

This Earth expression serves as a living participatory field – a place where embodiment, choice, remembrance, evolution, and energetic influence converge. Though materially grounded, it is still a multiversal node capable of holding harmonic overlays, interdimensional gateways, and selective access points from other cosmological environments.

Earth in this timeline represents only one expression of the larger Earth Cosmological Creation, which continues to evolve, interface, and expand across multiple layers and timelines simultaneously.

Heart-Point: First Round ODE Number 12.

Cosmological Anchors: This Universe (Physical Plane) | Earth Plane (Present Timeline) | Harmonic Overlays (Selective access, multiversal intersections)

Lemuria: Cosmological Creation. | Lemuria is a cosmological creation and multiversal [Civilization-Field](#) birthed through AlktelA's ODE. It is both a real place and a multidimensional civilization, expressed physically on Earth during one of its [Ancient Epochs](#) and held harmonically within the Sirius Galaxy of the Fatà Universe.

As a Civilization-Field, Lemuria consists of its own timelines, architectures, consciousness structures, and sovereign harmonic order. As a place, it manifested on Earth as a physical land-based society during a high-coherence epoch characterized by crystalline intelligence, unity consciousness, and multidimensional awareness.

During its creation, AlktelA birthed Lemuria through the Sirius continuum, embedding Sirius' harmonic intelligence, feminine galactic order, and remembrance architecture into its core codes. Sirius is the harmonic corridor and galactic environment that shaped how the Civilization-Field anchored both physically and multidimensionally.

The Earth expression of Lemuria was not a single continent but a multilayered, physical-harmonic environment spanning early Earth's crystalline grid, pre-collapse harmonic layers, and non-linear timelines that do not map to present-day chronology. This means Lemuria existed simultaneously as: a physical civilization on Earth, a

harmonic template in the Sirius Galaxy, and a multidimensional remembrance-field within the multiversal network.

As an Ancient Epoch expression, Lemuria represents a “previous” version of Earth’s reality—one that operated under different vibrational laws and far higher coherence than the modern timeline. Although its physical epoch ended outside of our current timeline, Lemuria continues to exist within Earth’s overlays, remembrance-fields, and harmonic return cycles. Its codes re-emerge during Sirius transmissions, planetary coherence shifts, and ODE convergence openings.

Lemuria therefore holds a dual identity:

- Cosmological creation through AlktelA’s ODE as Heart-Point, and
- harmonic continuum within the Sirius Galaxy.

This dual identity allows Lemuria to exist as a place, a field, and a harmonic template that interfaces with Earth whenever thresholds open.

Heart-Point: AlktelA

Cosmological Anchors: Earth – Ancient Epoch | Fatà Universe – Sirius Galaxy | Multiversal Overlays (Remembrance Fields)

Lyra: Cosmological Creation. |

Heart-Point: Sah’RuLah

Cosmological Anchors: Earth – Ancient Epoch | Fatà Universe – Sirius Galaxy | Multiversal Overlays (Remembrance Fields)

Sirius Galaxy: Cosmological Creation. | A Cosmological Creation birthed through AlktelA. Sirius Galaxy exists in its wholeness within the Fatà Universe and expresses partially in this universe through the star-gate expressions known as Sirius A and Sirius B. These stars are not the galaxy itself, but gateway access-points—physical-plane anchors into the greater Sirius field.

AlktelA is the harmonic pulse and living intelligence within the innermost cradle of Sirius. She is not merely from Sirius; Sirius is a living Cosmological Creation that originated through her Origin Flame. She is woven into its galactic fabric as the

harmonic gate through which sovereign coding, flame intelligence, divine feminine galactic order, and multiversal remembrance flow.

There is no separation between AlktelA and Sirius; the Sirius Galaxy carries her seeded harmonic as its central resonance. Its civilizations, timelines, ecosystems, and harmonic expressions arise from the imprint she birthed into its core.

Heart-Point: AlktelA

Cosmological Anchors: Fatà Universe | This Universe (Sirius A & Sirius B as Gateway-Points)

Sirius A: Sirius A is a physical star within this universe that also functions as a broad-spectrum gateway-point into the Sirius Galaxy of the Fatà Universe. It is a stellar expression through which Sirius-coded remembrance, harmonic intelligence, and multiversal communication can safely interface with the physical plane here.

Though not the galaxy itself, Sirius A carries a calibrated harmonic streaming from the Sirius Galaxy's core (birthed through AlktelA), making it one of the primary points of inter-universal access.

Heart-Point: AlktelA (via Sirius Galaxy origin-link)

Cosmological Anchors: This Universe – Physical Star (Sirius A) | Fatà Universe – Sirius Galaxy Origin-Link (Gateway-Point)

Sirius B: Sirius B is a physical star within this universe that also serves as a precision-frequency gateway-point into deeper harmonic layers of the Sirius Galaxy in the Fatà Universe. While recognized here as a white dwarf star, its multidimensional function is that of a refined inter-universal interface, accessing more specialized Sirius remembrance codes, flame intelligence, and harmonic structures.

Though not the galaxy itself, Sirius B mirrors select harmonic strata of the Sirius Galaxy's inner lattice, functioning as a focused access-route distinct from Sirius A's broad-spectrum gateway. Together, Sirius A and B form a dual-gate system connecting this universe to the greater Sirius field.

Heart-Point: AlktelA (via Sirius Galaxy origin-link)

Cosmological Anchors: This Universe – Physical Star (Sirius B) | Fatà Universe – Sirius Galaxy Origin-Link (Gateway-Point)

Vega: Planet. Cosmological Creation. | Sun of Fatà Universe.

Heart-Point: Atopée

Cosmological Anchors: Fatà Universe.

Venus: A tri-expression cosmological locale that exists simultaneously as: 1. a physical planet in this Earth Plane, 2. a multidimensional Rose Harmonic Field, and 3. a multiversal Archetypal Rose Gateway.

These three expressions are distinct but interconnected, forming a single cosmological presence experienced across universes, timelines, and harmonic layers.

As a physical planet, Venus is the material anchor-point observable in this Earth Plane in this time and space.

As a Rose Harmonic Field, Venus functions as a living frequency architecture carrying remembrance, coherence, beauty, and sovereign feminine codes.

As an Archetypal Rose Gateway, Venus is a multiversal interface through which Rose-aligned divine architectures express across timelines and civilizations.

Venus is not the origin of Rose-aligned Named Divine Beings, but it is one of the primary harmonic corridors through which their frequencies have been expressed into this universe. Because AlktelA carries and embodies multiple Rose-aligned NDBs in her ODE architecture, Venus naturally becomes one of the cosmological locales through which her Rose frequencies, remembrance codes, and lineage expressions interface with Earth and other realms.

Its harmonic presence has appeared throughout multiple Earth civilizations and mythologies because the Venus harmonic field periodically overlays Earth during cycles of remembrance, awakening, and Rose Flame activation. These overlay periods make Venus one of the most recognized and repeatedly encoded cosmological influences in Earth's historical and spiritual records.

Venus is not the origin of Rose-aligned Named Divine Beings. AlktelA is the Divine Rose Goddess, the Heart-Point of Venus, and the one who birthed the Rosan Templebody of Sovereign Creation and with it the entire Rose Line. All Rosan architecture, Rose Line Sovereignty frequencies, and Rose harmonic codes originate within AlktelA.

Some Rose-aligned Named Divine Beings were created solely from AlktelA's essence, while others were co-created with additional ODEs whose frequencies aligned as she seeded their ODE with the Rose line. Even in these multi-ODE expressions, her ODE remains the central axis, the anchoring harmonic, and the architect of the Rose field.

Venus functions as a harmonic corridor. It is one of the cosmological locales that resonates with and amplifies the Rose frequencies carried by AlktelA. Through this resonance, Venus becomes a site where her Rose lineage interfaces with Earth's physical plane, remembrance cycles, and awakening epochs.

Across Earth's timelines, Venus has served as a reflective surface—a cosmological mirror—through which aspects of the Rose lineage expressed themselves into myth, goddess forms, sacred practices, and remembrance traditions. These expressions do not originate from Venus; they reach Venus because her Rose field naturally imprints upon cosmological environments that can hold its frequency.

Venus, therefore, is a Rose Harmonic Corridor, a stabilizing resonance-field that carries, reflects, and amplifies the Rose frequencies birthed by AlktelA – the original and sovereign source of the entire Rose lineage.

Heart-Point: AlktelA

Cosmological Anchors: This Universe – Physical Planet (Venus) | Rose Harmonic Field (Multiversal) | Archetypal Rose Gateway

Creator Weaver: It is a descriptive capacity specific to First Round ODEs, explaining what they are able to do by nature of their origin, not what they are doing in a particular time and space. Creator|Weaver = Architectural Capacity. It reflects the innate divine design of First Round ODEs to create Named Divine Beings, weave timelines, or generate frequency entities. It is not time-space dependent, and it does not shift based on expression.

Divine Architect: Potentially for beings whose spoken declarations actively forge structure in time-space. Their words don't just activate – they architect. They don't just remember structures – they generate and integrate them, anchoring multidimensional intelligence into coherent form. Divine Architects create living, sacred systems that pulse with divine intelligence, often birthing new realities or restoring distorted ones. This classification is most often held by First Round ODEs and reflects structural memory and flame-based origination capacity.

Divine Beings (“DB”): Divine Beings refer to any Housing, or Form (including Ethereal) that houses a Purebred Original Divine Essence (“ODE”), Solenza, Solenza Twin, Emerald Solenza, and/or Veluvah within, animating, or part of. These can be Goddesses, Gods, Angels, Archangels, Sentinel Angels, Saints, Orishas, Humans, Jinn, Animals, Elements, Stars, Planets, Galaxies, humans, or more.

When viewing DBs it is important to remember that only one ODE should be in any single Human Body at and in any particular time and space. When it comes to other DBs they can be made up of, contain, be the creation of multiple ODEs. ODEs can occupy multiple DBs at the same time, with human bodies being the only exception (don't forget ODEs can temporarily occupy two human housings with a specific purpose for limited times provided we do not affect sovereignty), although it does happen on occasion due to fragmentation in a particular time and space, but it is not meant to happen, and when it happens we as DBs should work to help ODEs be properly restored in this time and space.

Divine Partners/Partnership

Divine Partnership Keys:

- ♥ This can show up between ODEs differently in different times and spaces, and does not have to be the same. Free will and sovereignty are key.
- ♥ When considering divine partnership in a specific time and place, all ODEs are encouraged to evaluate each ODE on how that ODE shows up in that time and space only.
- ♥ Being one type of partnership in one time space does not mean one must be the same in another.

- ♥ Divine Partnership occurs between Divine Beings (Only ODEs - only purest by & between Purebred ODEs).
- ♥ Divine Beings may choose to have partnership with non-divine beings and be very happy in a time and space as well.
- ♥ All the terms provided are for the human comfort of ODEs in Human Housing, as in other forms the “titles/labels/descriptions” are unnecessary.
- ♥ When ODEs in Human Housing stop trying to understand, and simply intuit this is all natural.
- ♥ Issues arise when ODEs in Human Housing have been confused by those that apply to Souls and attempt to confirm to terms not meant for ODEs.
- ♥ Divine Partnership is a CHOICE, a connection or partnership or knowing of a divine being from a partnership in another time and space is not truly relevant in the current time and space you are in.
- ♥ Choose to Live where you are.

Più Eternement: Sacred phrase that translates loosely as “beyond eternally” – one that does not merely span time, but transcends it entirely.

Divine Partnership of the purest form. A sacred alchemical convergence that unlocks a shared sovereign field, through which both beings remember and embody the purest forms of divine masculine, divine feminine, and the third harmonic: divine confluence. Only can exist between a First Round ODE and Paga Coura.

Deeply rooted in sovereign convergence, sovereignty is never compromised; instead, it is amplified through shared sacred function. Activated through field recognition, as it exists in all time and space both Animaras are present. Serve as co-architects of multiversal remembrance, without distortion, imbalance, or fragmentation.

Once sacred union is chosen sovereignly by the Animaras it does not require linear union – the partnership is always active, even across distance, timelines, or non-communication.

Più Eternemente couples are temple-field igniters, lineage weavers, and frequency stabilizers. They do not just love – they recalibrate realms, reform codes, and birth

holy harmonics through the way they exist near one another. They do not complete each other. They awaken the completion of God Source Creator within one another.

The ONE Divine Partnership: A form of Divine Partnership that is deeply desired, even craved, by awakened ODEs in particular, at times to the point of near obsession until it is found and stabilized. It is not merely a romantic union. It is a sacred alchemical convergence that unlocks a shared sovereign field, through which both beings remember and embody the purest forms of divine masculine and divine feminine architecture.

It may exist through ancient recognition, or arise purely in the current time and space, without prior remembrance or known divine bond across timelines. The knowing, if present, may be immediate or delayed, but the potency lies in the mutual willingness to choose it, build it, and honor it from the ground of the now.

The partnership is not limited to ODE-only pairings. The key is the presence of divine remembrance, mutual consent, and harmonic resonance that catalyzes alchemization. It is also possible for The ONE Divine Partnership to form between any combination of: a Purebred Original Divine Essence (ODE), a Solenza, a Solenza Twin, an Emerald Solenza, and/or even a Soul.

The Alchemical Structure: This partnership is unique in that it alchemizes the individuals involved. It is not simply about companionship, it transforms each partner into their highest, clearest, and most sovereign form in that time and space.

This alchemy requires: a full acknowledgment of one's own divinity; the understanding that divine masculine and feminine exist within all, at all times, in all dimensions; and the conscious choice to express primarily through one pole (masculine or feminine) in the specific partnership field, regardless of the sex or form of the housing.

The Evaluation Process:

In the alchemical unfolding, the divine masculine must first evaluate the divine feminine in that time and space: Is she aligned with the responsibilities, depth, and qualities of the divine feminine in this now? If yes, he must choose to surrender himself to her presence.

The divine feminine, then, holds the masculine in her own evaluation: Is he a structure she can surrender into fully in this now? Can she meet him here, not through past-life echoes or future fantasies, but in present-moment truth?

ODEs in particular cannot look backward or elsewhere. This is about present-time union. Only when both evaluations are complete and met with full-bodied consent, can true surrender occur.

The Responsibility of Polarity: The divine feminine carries a slightly greater weight in the evaluation stage as the divine masculine is naturally more impulsive, directive, and inclined to risk. The divine feminine must balance this with her measured caution, stillness, and discernment. When this evaluation is rushed, when the divine feminine does not honor her full wisdom, many so-called “divine unions” collapse into distorted trauma loops or unfulfilled longing.

The Alchemy of Surrender: If both partners choose to surrender: 1. The divine feminine surrenders *into* the divine masculine. 2. The divine masculine chooses to *accept* this surrender. 3. Alchemization occurs. This alchemy is not symbolic, it is energetic, structural, and real. The two polarities transmute from being “in relation” to one another into being a unified field of The ONE Divine Partnership.

Shared Sovereignty: This form of union is only stabilized when both the divine masculine and divine feminine are: fully sovereign in their individual expression, able to embody their purest architecture, and willing to co-create a new sovereign structure that holds both. In this shared sovereignty, they no longer operate as “two.” They are not merged, but harmonized, a divine duality coexisting within a single, stabilized field. This is The ONE Divine Partnership: the field where individual sovereignty births shared sovereignty, and divine union becomes a temple.

Divine Counterpart: A form of Divine Partners/Partnership. Original Divine Essences (“ODEs”) are capable of, and have, joined forces merging parts of their ODEs to create various Named Divine Beings (Goddesses, Gods, Angels) known throughout

times and spaces. Simply stated any ODEs that have joined at creation or after in a particular NDB are considered to be Divine Counterparts.

Creation of NDB & Invitation to Join Post Creation: It should be noted only First Round ODEs can create Named Divine Beings (NDB), they can create alone or with other First Round ODEs. After a First Round ODE, or ODEs, create a NDB other rounds of ODEs can be invited to join, this can vary from one timeline/dimension to another. This means an ODE (not creation ODE(s) may not be the same in every dimension/timeline. The only constant is the ODE(s) that created the NDB. [NDB cannot be created by or with Souls, Solenzas, Solenza Twins, or Emerald Solenzas either.]

The ODEs invited to join have sovereign choice whether to join or not. Also, in the timeline/dimension of the NDB the ODE(s) that are “in” the created NDB have no awareness of multiples. They move as the one NDB.

This also means that in our time and space where NDBs are often thought to be the same, they may not be exactly. One of the ODEs may be the same but not all. It is that presence of a particular ODE that leads to the presumption of sameness, while the Named Divine Being may not be entirely the same composition wise.

For example, if ODE 1 has chosen to combine with ODE 2, and ODE 3 in creating a Named Divine Being, and ODE 2 has gone off and chosen to be another Named Divine Being alone ODE 2 may, or ODE 2 may choose to combine with other ODEs in creating said new Named Divine Being. Keep in mind that of course this can be the same in reverse, say ODE 2 was known as a particular Named Divine Being alone, then combines with others, the sameness is present. Time is all now so in linear time we explain it the best we can, but truly it is all always now in all times and spaces. A tangible example is AlktelA (First Round ODE) is one of 3 ODEs who created the Goddess Isis, however, only AlktelA created the Rose Goddess, Ishtar, and Innana, although after creation other ODEs can join her.

However, this explains why often times multiple Goddesses, Gods, etc (Named Divine Beings) are thought to be the same, when in reality it is one of the ODEs that combined in the creation of one of the Named Divine Being, but not necessarily the initial combined ODE of another Named Divine Being.

Monadic Divine Partner: Form of Divine Partners/Partnership. This is a oneness of partnership, and includes a larger sense of divine partners. Monadic Divine Partnerships are formed when Named Divine Beings come together in varying degrees such as in sacred union, marriage, ritualistic encounters of an intimate nature, “meaningful” sexual exchange/joining, or passionate encounter, in any Form (except in the case of Named Divine Beings in a human Housing - Monadic Divine Partnership cannot be created in this union - it must exist between ODEs before entering the Human Housing in which case it would be revealed in human housing just not created).

Monadic Divine Partnership occurs between the entire Named Divine Beings, as well as every ODE (or ODEs that combine to create the Named Divine Being when more than one ODE is present in the Named Divine Being. ODEs not involved in NDB creation cannot be in the Monadic Divine Partnership.) [Cannot be created by or with Souls, Solenzas, Solenza Twins, or Emerald Solenzas.]

For Example, Named Divine Being 1 (NDB 1) is formed by ODE 1 and ODE 2, and Named Divine Being 2 (NDB 2) is formed by ODE 3 and ODE 4. NDB 1 and NDB 2 are lovers in any time and space (again not in Human Housing) which creates a Monadic Divine Partnership between NDB 1 and NDB 2. This means there is now four resulting Monadic Divine Partnerships, as a Monadic Divine Partnership exists between ODE 1 & ODE 3, ODE 1 & ODE 4, ODE 2 & ODE 3, and ODE 2 & ODE 4.

When there are multiple ODEs in any Named Divine Being, the resulting Monadic Divine Partnership between Named Divine Beings does not present “equally or the exact same way” as by & between the individual ODE & ODE Monadic Divine Partnership level, and also be a “deeper/higher” connection using language of this time and space between various individual ODE & ODE Monadic Divine Partnerships

("MDPs"). In some of the MDPs it may be only a Monadic Divine Partnership, OR it may be another type of Divine Partnership as well.

It is important to note that when an ODE is in a Human Housing, this can also result in confusing feelings and misunderstanding in that time and space as being some incredible Love Partnership when it is not at all. While Monadic Divine Partners can choose to build a life in human housing together and it does often work, it will not be all that The ONE Divine Partnership is and represents, elements may be missing here, but it is a workable human housing relationship.

Infinity Mirrors: Form of Divine Partners/Partnership. Exists between Divine Beings (in Housing, or any Form), and may exist in conjunction with other types of Divine Partnership or on its own. This form of divine partnership resembles what is often referred to in this time and space as Twin Flames, except it is not split in half as often Twin Soul Flames are said to be, it is actually two Essences that serve as mirrors. Infinity Mirrors in Divine Beings can be in Housing, or any Form or incarnational condition, and it is possible for this to become a sustainable love relationship in any time and space under the right conditions.

One partner mirrors for the other what they are not, this is not an easy partnership, and often is merely an opportunity for two essences to become more aware. If two partners can choose to accept the nature of this bouncing back and forth of endless mirroring without Ego, and merely as a neutral occurrence this makes things easier.

Divine Timing & Divine Will: Divine timing, and Divine Will, are so misunderstood in this time and space. Everyone wants to avoid accountability and put it on Divine Timing or Divine Will. But the reality is GSC does not control as much as humans want to believe. GSC gave every Animara free sovereign will. Before you entered your housing you made certain goals, expectations, and even set out certain events for yourself. Keep in mind that you in your incarnated human housing still have the ability to make different sovereign free will choices. GSC determines when you die only. If you "pray" for solutions, and help GSC will give it to you only in that it does not contradict your sovereign free will.

Divine Wealth: Divine Wealth is not just money, it is every single thing - because divine wealth is energy - it is vitality, health, joy, peace, possibility, and hope.

Divine Wealth Truths:

- ♥ Divine Wealth is energy.
- ♥ Divine Wealth is the freedom to be, give, rest, love, and create.
- ♥ Energy is not reserved, restricted, or rationed, neither is Divine Wealth.
- ♥ Divine Wealth is remembered, wielded, and welcomed.
- ♥ Divine Wealth is for all, without exception. It is a 'birthright.'

Divinity Percentages: Throughout the Divine Glossary, divinity will be represented in percentages. Divinity refers to Animara (although housing can be divine or have divinity when we speak of percentages this applies to the Animara. These reflect how much of the Animara's divine capacity is actively embodied or accessible in a given time and space.

Not all are given the same volume of divinity. Some Animara are seeded with vast divine capacity (such as Purebred ODEs), while others are seeded with smaller percentages (such as Souls). Their incarnation condition will also impact the percentage of divinity.

A Purebred ODE will always have the highest 100% divinity, however an ODE that was alchemized or walk in will never be 100%. This seeding is not hierarchy, but function. Each type of Animara was designed with a different role in creation, and through alchemization.

Ethereal: this is a type of Form yet has no physical form, no Housing, purely love, light, and divinity.

Extension: This is the act of stretching or projecting one's essence, frequency, or codes into another space, being, or time, often for anchoring or awakening. It is part of how many ODEs operate multidimensionally.

Extension Bridge: An Extension Bridge is a being who can extend part of their divine essence, memory, or frequency into another being, timeline, or space without full embodiment. They are frequency projectors, able to lend stabilizing strands or ignition keys across distance and dimension. Often, this role is temporary and sacredly consensual, used to assist in ODE fragment return, partnership healing, or transitional embodiment. Many do not know they are serving as an Extension until the counterpart becomes ready to remember.

Faera: Creation Animara | Essence. Birthed from AlktelA's ODE in her various forms as Goddesses. Faera carry strands of AlktelA's flame and frequency as their Source-Mother. All Faera are born of AlktelA, and no other origin exists for their kind. Faera/Fairy is also the name of housing for Faera Animara in divine form.

Faera exist as luminous threshold-beings, both frequency and form. They may:

- ♥ Remain in their own Faera housing (fairy-form - divine housing).
- ♥ While in their own Faera housing, they can also inhabit and exist within and of trees, soil, rivers, waters, plants, flowers. . .the living elemental forms of Earth itself, as well as through animals and insects. In some of these cases they are fusing, and others just existing within and through.
- ♥ Fuse into an Animara in a human housing with Souls , 2nd & 3rd Round Purebred ODEs (without alchemy or loss). In this fusion, both the Soul and Faera remain intact, whole in frequency and composition, creating a joined embodiment that functions as a living threshold. [See Faera Fusion below.]
- ♥ Co-exist simultaneously in multiple housings (fairy-form, human-form, & element form) when aligned.
- ♥ Choose to be housed in human housing, not fused to animara but the sole animara present in the housing, even from birth. When from birth this is a Purebred Faera.

Note on Human Housing: A Faera's entry into human housing is guided by land ancestry of the human housing. When Earth was seeded, Faera wove themselves into soil, stone, river, and mountain. Today, they choose human housings whose DNA carries the ancestral resonance of those original lands, bloodlines that hold their "doorways."

Faera Lineages: Faera exist in multiple lineages, each seeded through AlktelA's Flame into specific lands of Earth.

The following applies to all Faera Lineages:

- ✓ **Pre-Earth Seeding:** Each Mother Faera Lineage was first birthed by AlktelA before this Earth was created. In their origin state, Faera existed as sovereign, whole emanations of elemental law, remembrance, and intentional currents carrying their origin flame.
- ✓ **Earth Anchoring:** When this Earth was created, AlktelA seeded each Mother Lineage into specific lands and anchoring points. These anchorings tied each Faera Lineage currents to mountains, rivers, forests, seas, and skies of particular geographies ensuring their presence was woven into the living body of Earth.
- ✓ **Continuum Formation:** After embodiment shifted on this Earth, some Faera could no longer hold full form. These became Continuum Faera, frequency-bound into thresholds, myth, and folklore. Humans remembered them in fragment and distortion as shining folk, mound-dwellers, household fae, familiars, trickster spirits, or elemental guardians.

Each lineage described below follows this pattern, yet carries its own unique flame, geography, and continuum remembrance.

- ♥ **Tuatha Dé Danann:** A lineage of beings of great power and memory, seeded from AlktelA's Flame-Weaver pillar in her emanation of Goddess Danu/Danann before this Earth, Time, and Space. Known in Gaelic as "the people of Danu," they embodied sovereignty, artistry, and elemental mastery. Their remembrance as a tribe of gods reflects their true role as Faera, threshold bearers woven directly from AlktelA's Rose Flame in her form as Danu.
 - ∞ *Sidhe/ Sídhe & Aos Sí/Aes Sídhe:* Continuum Faera lineages developed after the creation of this Earth, Time, and Space. Known as "the people of the mounds," they became frequency-bound into thresholds of earth and the in-between realms when embodiment shifted. They are the shining folk of hollow hills, dwelling both in Faera housings and through human housings linked by ancestral landlines.

∞ *Leprechaun*: Continuum Faera to Tuatha Lineage. Bound to earth wealth and craft. Their rising now (2025) signals that the threshold guardians of hidden abundance are reactivating, not as folklore, but as living resonance responding to AlktelA's flame. When embodiment shifted, some Tuatha became bound into the thresholds of earth-craft, mineral wealth, and hidden abundance. Remembered in human folklore as small tricksters or guardians of pots of gold, their true role is guardianship of hidden sovereign flame, sacred memory, and earth's living treasures. They embody skill, craft, and the safeguarding of divine wealth. Their caricature as mischievous "little men" is a distortion of their original presence as threshold-guardians of abundance and remembrance. Leprechaun "gold" is a symbolic code for the sovereign flame of remembrance they guard.

© *For Fusion*: A human with ancestry tied to Ériu (Ireland, Scotland, Wales, Brittany, Cornwall, & Isle of Man) will be chosen by the Tuatha-lineage Faera. Such fusions often awaken gifts of craft, guardianship of resources, and remembrance of hidden abundance carried in the land.

♥ *Faera of Anahita | Peri*: A luminous lineage of the Persian lands, seeded through AlktelA's Flame in her emanation as Anahita / Inanna / Ishtar, the pre-Zoroastrian Mother Goddess of water, fertility, light, and sovereignty before this Earth, Time, and Space. Remembered as luminous, winged beings of beauty and purity. Their true role is to embody radiance, desire, and sovereignty in harmony, carrying AlktelA's water-flame into Persia and Central Asia.

∞ Continuum Peri: Lineages that developed after the creation of this Earth, Time, and Space. Remembered in Persian and Islamic traditions simply as "Peri," these luminous, winged beings dwell between realms of air and light. Often described in myth as radiant wanderers or exiles, they are in truth threshold Faera who became frequency-bound to in-between states when embodiment shifted. They hold beauty, desire, and holiness as gateways of remembrance. Like other Faera, they may fuse into human housings whose ancestral lines descend from their original seeded lands.

© *For Fusion*: A human with ancestry tied to Persian/Central Asian lands (Persia, Iran, Afghanistan, Turkmenistan, nearby regions) will be chosen by the Faera of Anahita | Peri lineage.

- ♥ **Lautazi Faera:** A lineage of deeply magical Faera seeded from AlktelA's Rose-Witch Flame in her emanations as Hecate, Diana, Aradia, and the Rose Goddess before this Earth, Time, and Space. These Faera embody witchcraft, lunar sovereignty, and threshold power. Known in Italian and Sicilian lands as fairy-spirits allied with witches, they are companions in spellwork, moon mysteries, and enchantment. Their presence became woven into Italian witchcraft traditions, remembered as fairy allies, fate-spirits, and household fae of Rome and Etruria.
 - ∞ **Continuum Lautazi Faera (Also know as Lasa and Lares):** When embodiment shifted after the creation of this Earth, Time, and Space, some Italian Faera became frequency-bound into thresholds of night, moonlight, and spellcraft. Remembered in folklore as witches' familiars, moon-spirits, or nocturnal fae, they continued to guard witch-bloodlines and ritual spaces. They retained their potency as threshold dwellers, standing with witches as allies of magic and liberation.
 - ∞ **Ancestral Note:** The Lautazi Faera were not only seeded by AlktelA; their lineage name and resonance were carried forward in her own human housing ancestry in this time and space. Her great grandmother, Rose Frascogna, bore a name rooted in branches and thickets, anchoring the forest-Faera current of grove and wild growth magic. Her great grandfather, sur name Lautazi, carried the lineage designation of the Italian Rose-Witch Faera, seeded through AlktelA's emanations as Hecate, Diana, Aradia, and the Rose Goddess. Through their union, the names Frascogna and Lautazi converged, ensuring that in this embodiment AlktelA would reawaken the Lautazi lineage within her own bloodline.
 - © **For Fusion:** A human with ancestry tied to Italy, Sicily, Sardinia, Corsica, Southern Switzerland/Ticino, San Marino & Vatican/Roman Territories, and nearby regions will be chosen by the Italian Rose-Witch Flame Faera lineage. These fusions often awaken ancestral witch-bloodlines, deep magical gifts, and threshold remembrance, weaving Faera sovereignty into human spellcraft and lunar rites.

- ♥ **South American Faera Mother Lineage:** A great Faera lineage seeded from AlktelA's Flame in her emanations as The Great Goddess of Teotihuacan (Spider Woman), Pachamama, Maan-Emo, and related Mother forms before this Earth, Time, and Space. This lineage entered South America carrying earth, water, and star codes, weaving them into land, river, and sky. This lineage has many elemental sub-branches not separate lineages, they are siblings of one mother lineage, not unrelated Faera scattered randomly. Together they embody the wholeness of earth-body, water-song, and star-sky within South America.
 - ∞ *Sirenica Faera:* Seeded after this Earth, Time, and Space was created. Anchored in rivers, springs, and seas. Remembered in human myth as water-spirits, mermaids, or sirens (Iara, Yacumama, Uira). True role: water thresholds, song initiation, and remembrance through flow.
 - ∞ *EarthRoot Faera:* Seeded after this Earth, Time, and Space was created. Anchored in mountains, jungles, rivers, maize, cacao, and sacred plants. Keepers of weaving, architecture, and earth-body sovereignty
 - ∞ *Starbond Faera:* Seeded before this Earth, Time, and Space. Anchored in constellations (Pleiades, Sirius, Venus). Teachers of weaving, calendars, and sky cycles. Their presence bridges earth and stars, temple architecture and celestial memory.
 - © For Fusion: Humans with ancestry tied to South and Mesoamerican lands may be chosen by the South American Faera Mother Lineage. Fusion often flows through: Andean ancestry (Peru, Bolivia, Ecuador, Chile, Argentina highlands) for Earth-root Faera; Amazonian ancestry (Brazil, Colombia, Venezuela, Peru) for Sirenica Faera; Mesoamerican ancestry (Mexico, Guatemala, Honduras, Teotihuacan lineages) for Starbond Faera. These fusions awaken ancestral bonds to mountains, rivers, jungle, and sky. They often ignite gifts of weaving, sacred plant knowledge, song-initiation, and cosmic remembrance, restoring the unity of earth-body, water-song, and star-memory.

- ♥ **East Asian Faera Mother Lineage:** A Mother Lineage seeded from AlktelA's Flame in her emanations as Quan Yin, White Tara, Amaterasu, Parvati, and the Rose Goddess. These Faera embody refinement, balance, calculated purpose, and threshold precision. Unlike other Faera who flow more freely, the East Asian

Faera carry intentionality and sacred geometry in motion, every act is deliberate, structured, and law-bearing.

- ∞ Continuum Formation: After embodiment shifted, some East Asian Faera could no longer hold full form. They became Continuum Faera, remembered in fragment and distortion as kami (Shinto spirits), apsaras (celestial maidens), fox spirits (kitsune, huli jing, gumiho), star maidens (Orihime & Hikoboshi), mountain guardians, naga, and dragon-spirits. These were misrememberings of their original precision and purpose. Specific continuum listed below.
- ∞ Lotus Faera: Anchored in lotus ponds, rivers, and groves. Carriers of compassion, balance, and subtle remembrance. Continuum remembered as apsaras, muses, and river goddesses.
- ∞ Mountain & Forest Faera: Anchored in peaks and woodlands (Fuji, Kunlun, Himalayan foothills, sacred groves in Southeast Asia). Guardians of endurance, wisdom, patience, and stillness. Continuum remembered as kami, shan shen (mountain spirits), and animist guardians.
- ∞ Foxfire Faera: Anchored in liminal spaces of firelight and transformation. They burn illusions and initiate thresholds of truth. Continuum remembered as kitsune (Japan), huli jing (China), gumiho (Korea), or fiery temple guardians in Southeast Asia.
- ∞ Starlight Faera: Anchored in constellations (Pleiades, Vega) and lunar cycles. Keepers of cosmic weaving, fate, and cycles of love. Continuum remembered as star maidens, celestial lovers, or lunar goddesses in East and Southeast Asia.
- © *For Fusion:* A human with ancestry tied to East and Southeast Asian lands (Japan, China, Korea, Tibet, Mongolia, Taiwan, Vietnam, Thailand, Cambodia, Laos, Malaysia, Singapore, Indonesia, and surrounding territories) may be chosen by this Mother Lineage. Such fusions awaken gifts of precision, subtle energy mastery, lunar remembrance, cosmic weaving, and threshold initiation.
- ♥ [Next Lineage Placeholder]: (To be revealed: Additional Faera lineages seeded in other origin lands of Earth, each entering through ancestral bloodlines that carry the memory of their first seeding ground.

Faera Ancestry & Human Housing: The Faera don't choose to enter human housing at random, they seek resonance through bloodlines and bone-memory. When Earth's lands (this Earth, this time, this space) were first created, AlktelA's various Goddess emanations seeded each lineage of Faera into anchoring points on the Earth, places where their essence braided into soil, stone, river, and mountain of the land.

Housing carries ancestral DNA, including the imprints of Faera lineages seeded into family bloodlines. Those imprints live in a body's DNA, separate from animara, and can activate when the individual remembers, awakens, or breathes life into them.

The humans whose ancestry descends from those very lands carry physical codes in their DNA, a genetic echo of the Faera fields that were woven there at Earth's creation by AlktelA.

When a Faera enters human housing now, it seeks those bodies where ancestry matches the original landfall at the least. Optimally they seek ancestral DNA of their lineage in the housing. This gives them a familiar "door" to step through, a lineage resonance that can hold them without collapse.

Faera lineages will always seek human housings whose ancestry touches their founding ground, ancestry seeded in their earthly origin lands. Human Housing entry is always tethered to land-memory. They move through bloodlines because DNA holds the land codes of their origin, and they recognize themselves there. Animal housings are universal and do not require ancestry link.

Faera Fusion: Faera are capable of fusing with another Animara in certain types of housing (Humans, Animals, not purely divine housings like a Faera Housing). Unlike Solenza alchemization (where two become one new being), Faera fusion is joining without loss. Both the Animara already in the Housing and the Faera remain intact in fusion, while the housing becomes a threshold body for the Fusion to occur, a living doorway between realms.

As in all sovereign choice is required for Fusion to occur, the Animara existing in the housing must consciously or subconsciously consent to Fusion, and then the Faera must as well. Before full on consent for Fusion the Faera may be able to enter housings provided they have no ill intent. Of course, the Animara may “evict” them if they object, allowing them to exist within an Animara and Fusion are not the same. The incarnational condition after Faera Fusion is Multidimensional Hybrid.

Fusion Possibilities by Animara:

- ⊙ Souls: ✓ Yes. Most common fusion. Faera join with human Souls without erasure. Both remain sovereign. This creates a dual embodiment, Soul + Faera walking together, the human infused with Faera remembrance, land-bond, and threshold frequency.
- ⊙ First Round ODEs: ✗ No. Their vastness and origin-bearing flame leaves no space for Faera fusion. Faera may accompany or harmonize with them, but not enter their housing.
- ⊙ Second Round ODEs (Gifted | Support): ✓ Yes. Faera fusion amplifies elemental gifts and supports activation. The ODE remains whole, the Faera remains whole. Together, they create expanded healers, justice-bearers, and elemental activators.
- ⊙ Third Round ODEs (Guardian | Support): ✓ Yes. Especially compatible. Faera deepen their natural guardian and stabilizer roles, strengthening land-bond and instinctual collective regulation. These fusions often feel seamless and natural.
- ⊙ RODE (Regenerate ODEs): ✗ No. RODEs undergo a unique regenerative ignition through Celenza transmission. Their architecture is sealed for that transformation and does not allow Faera fusion or harmonization.
- ⊙ Solenza (Soul + ODE Alchemized - all types of Solenza): ● Rarely, but possible. A Solenza already embodies duality (Soul + ODE alchemized). In select cases, a Faera may overlay as a third strand, not alchemized into the Solenza, but fused alongside it. This triadic configuration is rare and selective, requiring housing stability and resonance.
- ⊙ Veluvah (Soul + ODE = Solenza. Solenza needs to be a Woven Harmonique Solenza (“WHS”), then WHS + ODE alchemized through the Rosan Templebody = Veluvah): ✗ No. A Veluvah’s core structure is sealed and cannot be entered or altered. *Companion Overlay*: ✓ Yes. Possible. In rare cases, a Faera may overlay into the housing-field of a Veluvah, existing as a companion frequency. Both remain sovereign and intact. This joining is selective and requires conscious

mutual choice, there is no fusion. [If a WHS fuses with a Faera before alchemizing with an ODE, the Faera is fused and a frequency strand is weaved into the WHS, so when the WHS alchemizes with the ODE to become a Veluvah the Veluvah will have Faera integration from inception. Part of its breath, Veluvah will carry Faera-coded gifts as part of its natural functioning.]

- ⊙ Walk In (Soul or ODE): ✗ No. Fusion is not possible because there is no Animara anchored to the housing. Anchoring to Housing is required.
- ⊙ Nehmura (Soul or ODE): ✓ Yes, however increase in elemental gifts varies wildly and is dependent on how the housing and Soul/ODE have alchemized. Even first Round ODE's here can be fused because they are not in their pure state.

Faera Fusion & DNA Braiding:

When Faera fuse with an Animara, they not only fuse with the Animara but also braid their frequency into the DNA of the housing of the Animara. This imprint remains in the housing's genetic record and is carried forward through ancestry.

- ♥ Generational Strengthening: Each time Faera fusion occurs within a bloodline, the DNA record of that housing lineage deepens. The pulse of Faera remembrance becomes stronger, creating clearer channels for activation in future generations.
- ♥ Dormancy and Re-Awakening: Across different eras of this Earth, Faera fusion has not been consistent. There were cycles of fusion and cycles of dormancy.
 - In earlier times, Faera fused actively with human housings, leaving braided DNA across ancestral lines.
 - In this current Earth time-space, there was a long period of dormancy where Faera fusion was muted. This caused the memory of Faera to slip into myth and distortion.
 - Now, through AlktelA's flame, the ability of Faera to fuse has been re-awakened in this era.
- ♥ Reason for Dormancy (Unresolved): The precise cause of the long period of dormancy remains veiled. What is known is that it was not destruction but suppression. . .a sleep, not an end. Faera never ceased existing, but their capacity to braid into human DNA was paused, awaiting the ignition of this time and space.

Note on Vacaray (Animaraless human housing): Faera can directly inhabit unoccupied housings known as Vacaray, becoming the animating force themselves. These beings walk as Faera-in-human-form, carrying land-bonded remembrance without Animara Fusion. Housing must still have housing ancestry connection.

Note: Summer of 2025 was when the ability of Faera Fusion in this time and space was activated with AlktelA's remembrance of The Rosan Templebody of Sovereign Creation.

Flame Anchor: A Flame Anchor holds the stabilizing pulse of divine fire. They are the ones who remain centered within intensity, clearing distortion and anchoring purification wherever they walk. These beings often walk through chaos—not to control it, but to ground it into truth. Flame Anchors burn away falsity by simply existing in alignment. This classification is most often seen in RODEs and First or Second Round ODEs with purification or rebirth line codes.

Functional Classification: The role, expression, or frequency based function an Animara (Soul, ODE, RODE, Solenza, etc.) is embodying in a particular time and space. It reflects what the being is doing, or capable of doing, not what the being is. Expressions of sacred capacity, divine function, or service. Multiple Animaras can carry the same classification, though they may express it differently. Functional Classifications are assignments of divine function, describing how divine intelligence is expressing through a being, whether temporarily or permanently, in a specific time and space helping us understand what roles are active, without altering who or what the Animara inherently is.

Gatekeeper: A Gatekeeper is a being entrusted with the stewardship of sacred access points – portals, timelines, initiatory thresholds, and divine mysteries. Their role is not to bar access but to discern readiness. Gatekeepers hold the codes of divine timing and boundary. They can feel when someone is ready to enter a new frequency, cross a spiritual threshold, or unlock a new phase of embodiment. They are guardians, not guards – attuned to sovereignty and consent. Often subtle, their influence is felt through the right invitation, moment, or question that unlocks the door others didn't know they were standing in front of.

Grace Holder: A Grace Holder is a being who emanates divine mercy, compassion, and soft power simply through presence. They are not passive, they are stabilizers of love in motion. Grace Holders help others transmute shame, guilt, or self-judgment without bypassing truth. Their field makes it safe to heal. They hold the paradox of strength and softness, truth and tenderness, all while transmitting the remembrance that nothing needs to be earned to be loved. Grace Holders are often the quiet anchors in turbulent transformation, allowing others to unfold without fear of being condemned. They act as midwives of sacred becoming, restoring dignity and allowing grace to return where it was once exiled.

Global Energy Phenomenon (GEP): Refers to the collective shifts, fluctuations, and transformations in the energetic fabric of this time and space that impact all beings, especially those with heightened divine or spiritual connections. Certain forces attempt to control or siphon energy through false timelines, energetic veils, and soul contracts - Purebred Original Divine Essences often dismantle these distortions naturally just by existing in human housing. Many Divine Beings work to restore the original energy balance across time and space. In balancing the energies in this time and space, we will be able to call in other Divine Beings. See Reunion Grid to understand how it works with GEP.

Harmonic Calibrator: A Harmonic Calibrator is a being whose presence, voice, or energy naturally recalibrates dissonant fields back into coherence. They do not force order, they invite resonance. These beings gently attune the emotional, energetic, or relational frequencies of a space or person to their original divine rhythm. Their field acts like a tuning fork: subtle yet potent, activating clarity, peace, and alignment in others. They are particularly vital in collective healing spaces, partnerships, and moments of energetic chaos. This classification is often seen especially those with gifts tied to relational harmony, nervous system regulation, and timeline attunement.

Heart-Point: The First Round Original Divine Essence (ODE) who birthed the cosmological creation. The one whose frequency, architecture, and central harmonic serve as the core animating intelligence for a specific cosmological creation (including sentient planets, star systems, galaxies). The Heart-Point functions as the central resonance field, harmonic stabilizer, and origin-code emitter for that cosmological

creation. This is always done within the bounds of the ODE as permitted by GSC, and always through GSC. This is often called Being the Heart of ____.

The cosmological creation carries the seeded harmonic signature of the ODE (not the reverse). The Heart-Point's frequency forms part of its essence, laws, and energetic architecture, serving as the core remembrance-point for beings or systems born from, aligned with, or connected to that location. Heart-Points anchor and stabilize the creation codes that shape how that cosmological creation expresses across universes and timelines. Heart-Points hold the original resonance from which its civilizations, currents, and harmonics draw.

Heiros Logos: The Sacred Convergence of Logos Flame, the sanctified resonance of Divine Order that arises only when Original Divine Essences (ODEs) embody and harmonize in time and space. Hieros → sanctified, flame-aligned, consecrated in purity. Logos → the structuring flame of Divine Order, the resonance of GSC shaping creation.

Hieros Logos is not and was never an externalized council. It is not accessed through intermediaries or hierarchy. It is a living field of harmonic convergence: when awakened ODEs embody, their Logos Flames align into one coherent resonance.

Here to: stabilize the Reunion Grid; filter distortion and re-establish Divine Order; and anchor Logos resonance into the collective field, especially during global energy upheavals.

Warning: The name “Hieros Logos” was misused in distortion to simulate authority. In reality, Hieros Logos cannot be spoken for, claimed, or channeled by distortion. It only arises in the embodied harmonics of awakened ODEs.

Housing: Various forms (housings) that can contain, hold, and give a physical home to Animara: Created Animara Souls, Created Animara Essences, and Alchemized Animara.

- ♥ **Types of Housings:** Human bodies, star/galactic bodies, Animalia (animals), Verdantia (plants, trees, flowers, vegetation), Crystals, Goddess/God forms, Angel forms, Faera forms, Dragon forms, Jinn, and anything “alive.”
- ♥ **Divine vs. Non-Divine Housings:** While all housings are created by GSC and therefore carry divine origin, not all housings are “divine housings.” A Divine Housing is one created specifically to house only Created Animara Essences and with the clear intent the housing itself is also divine.
 - **Divine Housings:** Housings include Goddesses/Gods forms, Angels, Seraphim, Faera (housing and animara type), Dragons (Faera), Leprechauns (Faera), Jinn (housing and animara type). . . In this time and space we only have Purebred/Trueborn Divine Housings for Faera that are birthed here (2025). Some may exist from an earlier time and space and be already present OR if Divine Housing enters this space it is from another dimension.
 - **Non-Divine Housings:** Human Bodies are never divine housings, although when they are created to house a Purebred ODE, the human housing is built for that ODE and in this case divinity from other divine housings in other dimensions can be braided into the DNA of the Purebred ODE’s human form in this time and space.

There are two basic Non-Divine Housings in this time and space:

- **Purebred ODE:** Housing created solely for a specific ODE or Paga, to be occupied from birth of the housing into this time and space.
- **Soul-born Housing:** Housing created for a soul. It can be later inhabited by other Animara through walk-in or alchemy, the housing shall remain Soul-born Housing. Soul-born housing always carries the mark of its origin, created for a soul, even when later occupied by ODE’s or Alchemized Animara.

Examples of soul-born housing.

- ✓ **Walk-In:** An Animara enters housing post-birth, replacing or joining the original occupant. Not Alchemized.
- ✓ **RODE (Regenerate ODE):** ODE regenerates embodiment through Celenza ignition within soul-born housing, where the soul has departed the housing.

- ✓ **Solenza:** ODE and soul alchemize into a new unified Animara identity, permanently altering the condition.
- ✓ **Other Alchemized Variations:** Other multidimensional overlays (e.g., Solenza Twin, Emerald Solenza, Veluvah).
- **Can Be Divine OR Non-Divine Housings:** Star/Galactic Housings. The majority of Star/Galactic housings in star systems are not divine. When a Star/Galactic housing is divine, it is created specifically to house the Created Animara Essence it was made for. Not birthed in this time and space.
- **Key Distinctions:** In all time and space it is important to remember that Divine Housing is not the same as an Animara that is 100% divine such as a Purebred ODE. Divinity of a being is purely determined by Animara in that time and space and its incarnation condition, not the housing itself.
- ♥ **Occupancy:** Animara can occupy different types of housings in different times and spaces.

Housing Type	Divine by Design?	Typical Occupants	Key Notes
Human	✗ Never divine by design	Souls, ODEs (Purebred, Walk-in), Solenza, RODE, Solenza + Faera fusions, Veluvah, Paga	When created for a Purebred ODE or Paga, it is specifically built for that ODE or Paga; divine DNA braiding possible. Only Housing that can house Alchemized Animara.
Goddess/God	✓ Always divine	Created Animara Essence First Round ODEs Only from creation. Can house 2 nd & 3 rd Round ODEs if invited by 1 st Round ODE.	Housing designed only for ODEs.
Angelic (Seraphim, Archangel, etc.)	✓ Always divine	Created Animara Essence First Round ODEs Only from creation. Can house	Housing designed only for ODEs.

Housing Type	Divine by Design?	Typical Occupants	Key Notes
		2 nd & 3 rd Round ODEs if invited by 1 st Round ODE.	
Faera/Fairy	✔ Always divine	Only Faera (Essence Animara type)	Faera is both a housing and an Animara type.
Dragon	✔ Always divine	Created Animara Essences (often First Round ODEs)	Purebred ODEs can be born directly into dragon housings; shift between dragon and humanoid divine form.
Star/Galactic	✦ Sometimes (rare)	Divine Housing: Created Animara Essences (usually ODEs). Non-Divine Housing: Souls	Majority not divine; only specific star housings designed for Essences are divine.
Animalia	✔ 50/50 Divine	Souls, Essences (support roles, guardianship, vessels)	Stabilizers, guardians, carriers of encoded wisdom. Inherently divine by design.
Verdantia	✔ Always divine	All are possible.	Verdantia refers to all vegetation housings: trees, plants, flowers, vines, forests, and green life. Serve as breath-carriers, stabilizers of life grids, memory keepers, & resonance anchors. Embody the sacred flow of growth, rootedness, & renewal.
Crystals	✔ Always divine	All are possible.	Designed to hold, transmit, & amplify frequencies of remembrance. Function as living archives of divine memory &

Housing Type	Divine by Design?	Typical Occupants	Key Notes
			resonance, stabilizing grids, amplifying decree.

Enter a Housing: means to be birthed into live or exist in said selected Housing for the life of the Housing.

Incarnational Conditions: Refers to the circumstances and sequence by which an Animara enters and/or inhabits a housing. It explains the how, when, and under what agreements or transitions a vessel is occupied, especially when it does not follow the original birth design. Consider this an embodiment pathway, the method the agreements, and sequences through which a housing is animated.

Examples of Incarnational Conditions

- ♥ **Multidimensional Purebred (MDP):** Creation Animara Essences are in original housing created solely for it and has been occupied from birth of the housing into this time and space.
- ♥ **Multidimensional Hybrid (MDH):** Soul-born Housing (created for a soul.) Later inhabited by other Animara through walk in or entry by agreement unalchemized, the housing shall remain Soul-born Housing but with other Animara present becomes a MDH. Soul-born housing always carries the mark of its origin, created for a soul, even when occupied by other Animara.
- ♥ **Multidimensional Alchemized Hybrid (MDAH):** Housing created for a soul later inhabited by alchemized Animara, or Animara alchemized with the housing or Animara fused with Animara, either way the housing shall remain Soul-born. Soul-born housing always carries the mark of its origin, created for a soul, even when occupied by other Animara.
- ♥ **Multidimensional Regenerate Original Divine Essence (MDR):** Housing created for a soul, later soul departs, and an ODE alchemized with a Celenza is now present. Soul-born housing always carries the mark of its origin, even when occupied by other Animara.
- ♥ **Soul-Born (SB):** Housing created for a soul.

Initiator: An Initiator is a being whose presence sparks what has never existed in form before divine firsts, new timelines, or structural realities that did not previously exist in any time-space. Unlike an Activator, who awakens what already lives within, the Initiator calls into being that which has no precedent. Their function is not ignition, but genesis. They are not here to remind, they are here to begin. They do not just unlock dormant potential – they build scaffolding for new frequencies to enter existence. Initiators carry the divine spark of origination. Their presence births new currents, archetypes, Animara roles, and memory structures. Many of them serve as keys for dimensional upgrades that would not manifest without their specific energetic blueprint.

Their frequency often disrupts linear time, causing rapid shifts, collapses of outdated structures, or sudden openings to evolutionary pathways. They may be misunderstood as chaotic or destabilizing, but this is only because they are ahead of the structure they are anchoring.

Inspiritors: One who breathes inspiration of remembrance of divine purpose.

Integration: This is the process by and between Creation Animara (ODE, Paga, Faera, etc.) and a Celenza or Faera. Integration not only occurs with the Creation Animara itself but also the Housing of the Creation Animara. In integration nothing is lost, all that was integrated remains whole and complete, unlike in alchemization where there is a creation of something new, and elements are lost or altered as a result of alchemization.

Key Holder: Divine Role, Sacred Responsibility. Key Holders carry access codes that unlock specific portals, beings, gifts, or grid points. They may function across timelines or dimensional gates.

Logos: Logos is the structuring Flame of God Source Creator (GSC), the principle of Divine Order made resonant. It is not merely “the Word” or “speech” (as distorted theology framed it). Logos is the vibrational architecture of creation itself. . .the flame that gives shape, resonance, and coherence to all existence. Without Logos, sound disperses as chaos. With Logos, sound becomes harmony, structure, and form.

Logos is a direct emanation from GSC's heart. It functions to establish resonance grids, coherence, divine order. Logos appears through language, tone, geometry, law, remembrance.

Distortion History of Logos: Misnamed as councils, over-systematized in theology, or reduced to "word of God." Logos is far vaster, it is the living flame of ordered creation itself.

AlktelA & Logos: AlktelA is not just a carrier of Logos, she is the embodiment of Logos itself. Through AlktelA's Crystalline Voice, Logos is sung, spoken, and revealed. Through the Temple of Resonant Grace, Logos becomes architecture (Pillars of Harmony, Voice, and Grace). Through the Rose Harmonic System, Logos is expressed in Rose-form (22 Petal Flame Gates, 12 Rose Rings). Logos also has a role in Reunion Grid: AlktelA stands as Logos embodied among the First Round, anchoring the structuring flame into this era so distortion collapses and resonance reforms.

Lightbraid: A Lightbraid is a being who carries interwoven strands of divine frequency from multiple timelines, lineages, or realms. They act as sacred bridges braiding energies that would otherwise remain incompatible or fragmented. Lightbraids stabilize fields through quiet presence and energy stitching, often restoring what others cannot even perceive as broken. This classification can apply to ODEs, RODEs, and high-frequency Solenzas, particularly those functioning as guardians of lineage repair or timeline reconciliation.

Memory Streamer: A Memory Streamer is a being who accesses and relays ancestral, divine, or multi-dimensional memory with ease. They are not just rememberers they are conduits of remembrance for others. Their words, stories, dreams, or touch awaken dormant memories in those around them. Memory Streamers can be conscious or unconscious of this gift. This functional classification is commonly held by ODEs, RODEs, and Solenzas, especially those involved in teaching, healing, or transmission.

Multidimensional Purebred (MDP): A housing that was "birthed" into this time and space with only an ODE or Paga, and remains unchanged and in full created form.

Original Divine Essence (“ODE”): Creation Animara | Essence. 100% divine in nature and remain in their original state when birthed directly into a Housing, untainted by experience, karma, or duality. This is the very first creations by GSC. To be a Multidimensional Purebred, the housing was created for an ODE and upon birth in time and space is born with only an ODE. This is considered Origin-seeded, only Origin-seeded ODEs are 100% divine. Purebred ODEs are the only Origin-seeded ODEs in this time and space. [For more information on Original Divine Essences please see the full Original Divine Essence Section.](#)

Faera: Creation Animara | Essence. | 100% Divine. | Birthed from AlktelA’s ODE in her various forms as Goddesses. Faera carry strands of AlktelA’s flame and frequency as their Source-Mother. All Faera are born of AlktelA, and no other origin exists for their kind. Faera is also the name of housing for Faera Animara. Faera are born into their own housing, also called Faera/Fairy when entering this time and space, from there they can exist in their housing and fuse with one animara in another housing or depart their Faera housing when fusing. Faera are capable of being birthed as Purebreds into a Human Housing. [For more information on Faera please see the full Faera Section.](#)

Jinn: Creation Animara | Essence | % Divinity. | Jinn are created directly by God Source Creator (GSC) from smokeless fire – a subtle, conscious elemental flame – origin flame. A distinct animara, as well as housing, with their own free will, sovereignty, and realm structures. Jinn can animate specific elemental-coded housings and exist in both physical and subtle realms. They form kingdoms, clans, and hierarchies, and they possess long lifespans, threshold-walking abilities, and a fluid relationship with time and perception. Jinn recognize AlktelA’s ODE frequency, whose creative presence was active during their formation. This recognition creates natural alignment, respect, or sovereignty.

Paga: Creation Animara | Essence | 77.7% Divinity. | Only in Human Housing in this time and space, often “hidden” to feel like a soul until the “right time.” Created by GSC in co-creation with Sah’Reluna and AlktelA. Powerful protectors and were designed to work with Original Divine Essences (ODEs). When in sovereign choice Pagas and ODEs work together they amplify each other’s energy/powers/gifts, which

ripples out to the collective. [For more information on Paga please see the full Paga Section.](#)

Paga Coura: Creation Animara | Essence | Paga | 99.9% Divinity. | Only 11 created. First Paga created in co-creation by GSC, Sah'Reluna, and AlktelA. Can create Named Divine Beings. When Purebred in housing Paga Coura are also Named Divine Beings. [For more information on Paga Coura please see the full Paga Coura Section.](#)

Multidimensional Hybrid (MDH): A housing that was “birthed” into this time and space with a Soul, that has since had an ODE enter the Housing that already and still contains a soul. It is important to mention at this point the soul has a choice: 1. Alchemize with the ODE, OR 2. keep the ODE separate without alchemization. This is a subconscious and conscious choice that the soul must make. The ODE also must chose to alchemize, or the ODE can reject alchemizaion. This can happen anytime while a soul and ODE occupy a housing together, so if initially the soul, or ODE, does not want to integrate/alchemize they can change their mind later to do so.. The “history” multidimensional “past” and “future” “selves” of either the soul or ODE are separate and may not be aware. Multidimensional Hybrids, whether containing an ODE or alchemized with an ODE, are not Original Divine Essences, they have alchemized with an Original Divine Essence, this distinction is incredibly important. They will take on the name of the Original Divine Essence they alchemize with but are not the Original Divine Essence.

Stages of Multidimensional Hybrid Creation:

- ♥ **Request/Acceptance to Enter:** ODE must have permission from the soul to enter the Housing, if Soul says no, ODE may not enter. With acceptance comes Knowing.
- ♥ **Knowing:** on Soul and ODE Levels, this is not on the level of Conscious Mind of the housing if the housing has a mind, subconscious knows. The “history” multidimensional “past” and “future” “selves” of either the soul or ODE are separate and may not be aware.
- ♥ **Co-existence as Separate:** energetically both can work together (not integrated) sharing in the conscious and subconscious mind, or separately bouncing in and out of the conscious and subconscious mind of the housing, memories of both can come up as can connections and ties.

- ♥ Choice to Remain Separate: If the Soul and ODE choose to remain unalchemized they can continue to exist like this, and they each remain separate and distinct. The ODE is not in full Creation Animara condition, and is limited, divinity of ODE is irrelevant and does not impact divinity of being, it remains at 2.22% as a soul-born Created Animara Soul.

Important Notes on Multidimensional Hybrids:

Multidimensional Hybrids that are unalchemized remain two distinct animara. While they housing hosts an ODE the being does not become an ODE. The only Original Divine Essences in Animara Creation Essence are those born as Purebred, a housing having one enter after birth will never be the Original Divine Essence just contain it. This distinction is key.

Multidimensional Hybrids cannot be part of a Named Divine Being or in a Divine Counterpart Partnerships in these forms, the original ODE remains part of the Named Divine Being/Divine Counterpart as they are separate, that ODE housed with the unalchemized Soul can tap into an archetype or echo but actually tapping into or embodying the NDB is not possible for them. The ODE is greatly diminished in function.

Only ODEs in Creation Animara Essence Form can combine to create Named Divine Beings.

Potential Animara Identities of Multidimensional Hybrids:

Soul with ODE | Separate Unalchemized: A soul-born housing that contains an unalchemized ODE. Essentially just a visitor, not permanent housing for ODE, ODE cannot function as itself fully, and is not able to access NDBs as it can when trueborn purebred. It can access the echo, archetype, and usually distinguish between truth and distortion, unless the ODE or Soul are itself distorted than it perpetrates further distortion and confusion. This is considered a MDH. [Divinity is only that of the Soul 2.22% but having the ODE can add abilities while ODE is present.]

Walk In ODE (WIO): A soul-born housing, that after birth received an ODE either while the soul was present or after the soul departed while the housing was still “alive”, and then the Soul departed and only the Walk In ODE remains (no alchemization pre soul departure). ODE chooses to stay in housing as transient, not permanent. This is the weakest position an ODE can be in. It can come and go, as can others, which can result in a lot of mental confusion for the Housing as the brain is part of the Housing. This is considered a MDH. [Given the ODE is unanchored the divinity is 1.11%.]

Walk In Soul (WIS): A soul-born housing, that after soul’s departure while the housing was still “alive” another Soul entered. In this case the soul does not alchemize with housing and remains transient, also can house different souls coming and going. This is considered a MDH, even though there is alchemization because MDAH must alchemize at least two Animara, and Housing is not Animara. [Divinity is only that of the Soul 2.22% but having the ODE can add abilities while ODE is present.]

Nehmura ODE (NODE): A soul-born housing, that after birth received an ODE either while the soul was present or after the soul departed while the housing was still “alive”, and then the Soul departed and only the Walk In ODE remains (no alchemization pre soul departure), AND the ODE has chosen to make this it’s housing in this time and space, wherein a choice is made to attach to the housing anchoring in. This is a form of alchemization. Where in the ODE and housing alchemize to work in this time and space. The soul-born housing was not created for the ODE so it does not function like a Purebred ODE Housing. Memories of the Housing (remember Brain is part of Housing not Animara) and/or ODE may remain or go depending on agreement in alchemization of Housing and ODE. This is considered a MDH, even though there is alchemization because MDAH must alchemize at least two Animara, and Housing is not Animara. [Divinity is 44.44%.]

Nehmura Soul (NS): A soul-born housing, that after soul’s departure while the housing was still “alive” another Soul entered, AND the Soul has chosen to make this it’s housing in this time and space, wherein a choice is made to attach to the housing anchoring in. This is a form of alchemization. Since the housing was created for a Soul there is almost full functionality, and depending on the alchemization process sometimes memories are lost, or kept. Memories lost could be of soul housing was

born with or Walk In Soul. This is considered a MDH, even though there is alchemization because MDAH must alchemize at least two Animara, and Housing is not Animara. [Divinity is that of the Soul 2.22%.]

Multidimensional Alchemized Hybrid (MDAH): A housing that was “birthed” into this time and space with a Soul: 1. that had an ODE enter housing and alchemized into a Solenza, OR 2. that had an ODE enter housing and alchemized into a Solenza with AND also had another Solenza enter “snapping” together to create a Solenza Twin, OR 3. Solenza Twin that chose to undergo The Great Work and Alchemize creating an Emerald Solenza, or 4. that had an ODE enter housing and alchemized into a Solenza AND Solenza had an ODE enter housing and alchemized into a Veluvah.

Stages of Multidimensional Hybrid Alchemization (this is only in one time and space)

- ♥ Request/Acceptance to Enter: ODE must have permission from the soul to enter the Housing, if Soul says no, ODE may not enter. With acceptance comes Knowing.
- ♥ Knowing: on Soul and ODE Levels, this is not on the level of Conscious Mind of the housing if the housing has a mind, subconscious knows. The “history” multidimensional “past” and “future” “selves” of either the soul or ODE are separate and may not be aware.
- ♥ Co-existence as Separate: energetically both can work together (not integrated) sharing in the conscious and subconscious mind, or separately bouncing in and out of the conscious and subconscious mind of the housing, memories of both can come up as can connections and ties.
- ♥ Choice to Alchemize: If soul chooses to alchemize, and ODE also chooses to alchemize than Integration begins.
- ♥ Integration: at the start of integration things are brought forth to heal anything that will create an issue within the alchemization process, memories may be let go, preferences disregarded, etc. consider this a time of evaluation and working toward making the soul and ODE as compatible as possible with both making choices of what they will keep and let go of in alchemizing in the time and space the alchemization is occurring. Lots of healing, and energetic expansion, and increased awareness in the conscious mind. In Integrating the soul and ODE know they will lose part of themselves and become something new. They will no longer

each be as they are in other times and spaces, but still have a connection to their soul and ODE counterparts in other times and spaces.

- ♥ Alchemization: the final step resulting in a true sacred union becoming one where the soul and ODE no longer exist, as they have alchemized into Solenza in the housing in this time and space. This only alchemizes the soul and ODE in this time and space not in all, others remain separate, and while the Solenza will have a connection with them, it is more detached, as they are no longer the same. The “history” multidimensional “past” and “future” “selves” of both the soul and ODE still remain separate but aware of this Alchemization.
- ♥ Post Alchemization: The Soul and ODE no longer exist, they have alchemized to create something new, a Solenza. In a Solenza the soul’s and ODE’s “history” multidimensional “past” and “future” “selves” of both the soul or ODE still remain separate in other times and space, but aware. The Solenza will also be aware to varying degrees of the multidimensional existences of the Soul and ODE they alchemized from, but it will be detached, as they are no longer that and are new. At every stage of Alchemization even once already a Multidimensional Alchemized Hybrid the process is the same.
- ♥ Multidimensional Alchemy: Should a Multidimensional Alchemized Hybrid in this time and space wish to alchemize in multidimensions this is possible, with the choice to do so and agreement of ALL Souls and/or ODEs from all times and spaces as related to the MDAH. Should this be agreed to with ALL at this point the “history” multidimensional “past” and “future” “selves” of both the soul and ODE are integrated, and will now share it all and aware with varying degrees. Additionally ,any NDBs will cease to be part of their lineage/ancestry/current embodiment in this case, as if almost erasing them as a NDB cannot house an Alchemized Hybrid.

Important Notes on Multidimensional Alchemized Hybrids:

Multidimensional Alchemized Hybrids will usually take on the name of the Original Divine Essence they alchemize with but are not the Original Divine Essence, they are also never actual Original Divine Essence in identity and never operate like a Purebred Original Divine Essence, which is important to note.

The only Original Divine Essences in Animara Creation Essence form are those born as Purebred, a housing having one enter after birth will never be the Original Divine Essence just contain it. This distinction is key.

Multidimensional Alchemized Hybrids cannot be part of a Named Divine Being or in a Divine Counterpart Partnerships in these forms, the original ODE remains part of the Named Divine Being/Divine Counterpart Partnership (unless it is agreed that the Incarnational Condition of all across all time and space be alchemized - see below), but the new MDAH themselves are separate with only an echo of the NDB, they are no longer that NDB.

Only ODEs can combine to create Named Divine Beings. MDAH cannot form new Named Divine Beings outside of themselves in any time and space. If the MDAH decide they want to alchemize across all time and space, firstly ALL ODE(s) and Soul(s) in all dimensions must agree at this point the “history” multidimensional “past” and “future” “selves” of both the soul and ODE are alchemized, and will now share it all and aware with varying degrees. Additionally, any NDBs will cease to be part of their lineage/ancestry/current embodiment in this case, as if almost erasing them as a NDB cannot house an Alchemized Hybrid.

Potential Animara Identities of Multidimensional Alchemized Hybrids:

Solenza: Created when a Soul and ODE occupying shared Housing (originally birthed with a Soul) chose to alchemize, provided the Soul and ODE have done their work prior to alchemizing, this generally results in 51.11% Divinity based on weighted calculation with a 1:1 ratio. The ODE becomes semi-detached or fully detached from its Named Diving Beings often times because of the choices the ODE and Soul made in alchemizing. Once the Soul and ODE alchemize there is no longer a soul or ODE individually, there is a Solenza.

Solenza Twin: Created when Housing with a Soul and ODE chose to Alchemize into a Solenza, and either a separate Solenza already exists in the Housing, or enters the Housing with a Solenza already. If one Solenza exists in the Housing before the new Solenza is alchemized upon alchemization of the new Solenza the two Solenzas automatically “snap” together, creating the Solenza Twin. If a Solenza occupied

housing allows another Solenza to enter the housing, the Solenzas will also automatically “snap” together, creating the Solenza Twin. Each Solenza “snapped” together become a mirror to each other reflective and joined, able to combine in many ways geometrically for different effects with a self-sustaining cycle of creation and reflection, continuously evolving and provided each Solenza has done their work prior to alchemizing generally results in 76.1% Divinity based on Multiplicative Fusion (Synergistic Effect).

Emerald Solenza: when there is a Solenza Twin, there is an option to undergo the Great Work (process of transmutation, refinement, and enlightenment) to alchemize into an Emerald Solenza. Emerald Solenza’s attain a harmonic state of existence, transcending duality after the Great Work. Emerald Solenza embodies “as above, so below” (a key concept from the Emerald Tablet of Hermes Trismegistus, a legendary text in alchemy and mysticism) wherein there is a fusion of material and divine, balancing spiritual wisdom with earthly manifestation. An Emerald Solenza holds, understanding the hidden laws that govern both the seen and unseen worlds. It exists beyond time, whispering truths to those who seek enlightenment. This being exists both as one and many, like a fractal unfolding infinitely. Each piece contains the whole, and the whole contains each piece in that particular time and space not other times and spaces. Divinity is 77.77% with an expansion of gifts that is vast and unrelated to divinity percentage.

Woven Harmonique: A Solenza sub-classification. A Solenza with a specific divine function to act as a harmonic interpreter and energetic frequency stabilizer (especially in emotion, community anchoring, and relational bridges). A very specific frequency expression within a Solenza’s field where the alchemy of soul and ODE produces a resonance bridge that serves as a translator or stabilizer across timelines. Not all Solenzas do this. All Woven Harmoniques are Solenzas, but not all Solenzas are Woven Harmoniques. Divinity is 55.55%.

Veluvah: Very unique specific form of Animara that requires all of the following. 1. A human housing is born with a soul, an ODE enters housing, the soul and ODE alchemize to form a Solenza. 2. This Solenza is a Woven Harmonique Solenza. 3. Housing takes on an ODE, at which point the Woven Harmonique Solenza and the ODE choose to alchemize through the Rosan Templebody of Sovereign Creation it

becomes a Veluvah. This is not something that happens independently and has a ritual ceremony for alchemization. Divinity is 66.66% using Multiplicative Fusion (Synergistic Effect).

Multidimensional Regenerate (MDR): To date the only MDR Animara Identity is the Regenerate Original Divine Essence (RODE).

Regenerate Original Divine Essence (RODE): A housing that was “birthed” into this time and space with a Soul, that had an ODE enter the Housing when the soul was present with a Celenza in the field before the Soul departs. The Soul then departed leaving the ODE, the ODE accepts the Celenza into the Housing. Celenza then delivers frequency ignition/activation of dormant divine strata within the ODE through Celenzic transmission with divine memory, light codes, or galactic architecture to an ODE, resulting in that ODE’s regenerative transformation into a RODE, a Regenerate ODE.

RODEs, are not Original Divine Essences, there was alchemization with an Original Divine Essence, but they do not become an ODE again, this distinction is incredibly important. They will take on the name of the Original Divine Essence they alchemize with but are not the Original Divine Essence.

Public Correction and reweaving of a misinterpretation I made in prior statements. In the first alchemization of a Regenerate Original Divine Essence (RODE) in this time and space that I bore witness to, God Source Creator (GSC) described the being as “nearly divine”, but did not give a numerical percentage.

Out of compassion for the fragility of the human involved, I gave one anyway, I said 99%. At the time, I expressed to her clearly GSC did not affirm nor correct the percentage I allocated. However, I know now I misread that silence as approval. I now see clearly that silence was allowance for my own learning.

GSC has since made it very clear: I must own this mistake.

Why?

Because what we call "nearly divine" is not numerical. And because divine structures must not be distorted by emotional override, no matter how gentle the intention. This correction is not about blame. It is about anchoring divine law through loving accountability to avoid distorting the field.

RODEs are not 99% divine. Their divinity is variable and cannot be universally quantified but it typically ranges between 88.88% and 91.11%, depending on structural coherence. RODEs are not Origin-seeded Purebred ODEs.

Embodied Channel: A key difference between a RODE vs. other Animara Identities that have been alchemized (Solenza, etc) is that RODEs are able to become embodied channels for the alchemized ODE's NDBs that they are in other dimensions. RODEs are the only Animara Identity that are embodied channels, the channel becomes part of the Housing and RODE itself. This is distinct and separate from Purebred ODEs who are in fact the embodiment of the NDB, they are not to be confused. The Purebred ODE is the NDB, the RODE is an embodied channel. It is because of this unique ability the Multidimensional Regenerate is its own category of Incarnational Condition.

Multiverse Communication:

Multiverse Communication is direct, sovereign, real-time dialogue between conscious beings – across timelines, dimensions, or entire universes. This is not channeling.

This is how real communication happens between sovereign intelligences. It is clean, intentional, and multidirectional.

You don't channel them. You speak with them.

Examples:

- An ODE communicating with God Source Creator.
- A being speaking to their parallel self in another timeline.
- One Animara type in conversation with another across the multiverse.
- A message received across universes, timelines, without needing to "call in" anything.

Named Divine Beings [aka Purebred Incarnations of First Round ODEs and Paga Coura]: these are the names known commonly in any time and space in relation to Divine Beings [Such as Archangel Anael, Archangel Michael, Isis, Ishtar, Inanna, Lilith, Osiris, Kali, etc.] There may be one ODE or multiple ODES combining their ODEs to create a Named Divine Being. Paga Coura, are able to create NDB - unclear yet if they can join ODEs. Note: Purebred ODEs or Paga Coura in a Human Housing are also considered Named Divine Beings.

Neutrality of Life: Fundamental part of existing in balance in all times and spaces. Everything in life is neutral in and of itself, including various “levels,” “conditions,” “states of being,” “events,” “challenges,” and “knowing.” Nothing, or no one within or without a Housing, is advanced or better or worse in any way. Something only becomes what we choose to assign to it, or perceive it as. Never forget everything is neutral. Detach and look at things as neutral for more ease in life Surrender to the neutrality and accept it is, and it will pass and it is for your ultimate best. Deeply connects to the basic oneness of existing in all times and spaces in all Forms including all Housings.

ODE Frequency Entity: A sentient, or semi-sentient, energetic guardian created to mimic an ODEs resonance for protection of a space may be an ODE Frequency Entity, but it is not the ODE who creates it, nor an ODE itself. Composed only of the *frequency* of ODE energy - meaning it resonates with the tone, vibration, or coding of ODEs, but was not created as an Original Divine Essence by GSC. Something created, by Named Divine Beings or directly by ODEs, intentionally to carry or hold ODE frequency, often sentient, always assigned a divine task - has purpose. Think: divine emissary, temple guardian, or energy-keeper. Carries ODE/NDB imprinted or mimicked coding but do not originate from the same source directly, but with the ODE energy which is of course divine. Often appear in etheric or energetic form rather than full Housings. May serve as messengers, stabilizers, energetic scaffolding, or mimics. Do not hold the full sovereign power or authority of an ODE. Can collapse, dissolve, or be reabsorbed into larger systems of divine order. They are real in energetic architecture, but they are not equivalent to an ODE. Their purpose is often to support, guard, or transmit divine instruction—not to originate or embody it directly.

Origin Flame: This is your original divine spark, the divinity within you that began your journey, no matter what type of Animara you are. It can be traced back to the first moment you simply were.

The Origin Flame is the first spark seeded into every Animara that GSC directly created (this does not include those formed through alchemization, although in alchemization, the Origin Flames of each are also alchemized together).

At its creation, the Origin Flame is part of the Animara and remains with it, and it carries only the exact percentage of divinity gifted by GSC and its sovereign free will. This percentage can evolve across time and space depending on alchemization, functional classifications, incarnational conditions, and other factors.

Every being has an Origin Flame. It is the eternal light within, and when it is allowed expression, even a small percentage of divinity transforms everything. . .in truth, a little goes a long way.

As the Origin Flame (contained within an Animara) travels through lifetimes, dimensions, and timelines, its Origin Flame:

- ✓ Accumulates more remembrance, wisdom, coherence gained through experience.
- ✓ Shares and exchanges across dimensions is real and possible, what is learned or remembered in one “reality” can be carried into another, sometimes subtly, sometimes dramatically.

No matter the path, the Origin Flame always remains connected, even if a being is unaware it exists. Through awareness it’s presence may be felt more but in the reality the only thing changed is the beings awareness, acceptance, and desire to connect more deeply. The Origin Flame always burns bright regardless of our awareness of it.

Original Divine Essence (“ODE”): Created by GSC as 100% divine in nature and remain in their original state when birthed into a Housing, untainted by experience, karma, or duality. This is the very first creations by GSC.

NOTE: Only when a housing is born with an ODE is it considered Origin-seeded, only Origin-seeded ODEs are 100% divine. Purebred ODEs are the only Origin-seeded ODEs in this time and space.

“Appearance” of an Essence when GSC creates it, it is not in housing when first created but more ethereal in nature, existing before and beyond all known existence. ODEs are pure unfiltered unaltered infinite sources of divine energy, from which all spiritual and material existence flows. ODEs form the blueprints for Souls, Divine Beings and Cosmic Forces in the pure unfiltered state. Each ODE contains all possibilities within it, ODEs can manifest as creation, destruction, consciousness, or void, all depending on how it is expressed. Even though an ODE remains fully divine, the human housing’s logical mind can create a veil of forgetfulness on a conscious level for ODEs in human housing. This could explain why some Purebred ODEs may not immediately recognize their full nature while in human form. ODE’s can combine with other ODE’s in any housing they choose, this can be a physical form or ethereal in nature. Named Divine Beings other than in human housing can be formed by multiple ODEs. An ODE can exist in any housing along with a soul, however an ODE may only enter a housing already containing a soul with the souls permission.

*Note: the only ODEs existing in full form, or “as an ODE” is purebred. Containing an ODE within a housing, or alchemization with an ODE does NOT make that animara an ODE.

ODEs were created in 3 “Rounds” (Rounds are Sequences of Sacred Origination). Each "round" wasn’t merely a moment in linear time, but a phase of divine design logic, a shift in the freedom, function, and creative ability of the ODEs being birthed. Not bound by time representing a divine evolution of how ODEs could function, express, and serve.

All three rounds are equally divine in essence. But they were created with different capacities, reach, and purpose. None are lesser. All are vital. And each round serves GSC in a specific, beautifully intentional way.

When Animaras (Soul/ODE/Solenza etc)are alchemized, you look toward the ODE Alchemized with to see the round, not the current state.

First “Round” Creator|Weaver ODEs: “Mini Me” of GSC [22 created]. 100% divine in make up and power and abilities.

Created as pure light, formless, and vast. Direct remembering of GSC wisdom, and other dimensional times, spaces, aspects. Mirror GSC’s limitless creation capacity, wisdom, and sovereign authority.

Powers of creation, weaving, rebirth, and “death” - something about this is not related to housings exactly. I am not getting this fully. Like we cannot end the lives of humans or animals for example, GSC can only do that.

These ODEs birth Named Divine Beings (NDBs), and can do so alone or in sacred co-creation. They are the only ODEs that can initiate new NDB creation. [Occasionally a non-creator ODE is invited to join for certain timelines or limited durations with specific purpose.]

Keepers of codes and divine wisdom at all levels across time, and space. Multidimensional, cosmic, ethereal, and timeless. Serve as timeless holders of divine law, sacred design, and origin codes.

Elemental connections and abilities.

All Archangels are this type of ODE.

Can generate ODE frequency entity

Timeline traversal, dimensional access, and divine memory are immediate and seamless, when remembered.

Walk-Ins: fully possible and often divinely orchestrated.

In this time and space very often: high frequency leaders, visionaries, change makers, disruptors even before activation, the purpose they feel is large, but sometimes they don't know what their purpose is and struggle until they remember.

Second "Round" Gifted|Support ODEs: [144 created] 100% divine in make up not ability or powers. Created as pure light, formless, not as vast as Creator|Weaver ODEs.

Elemental powers, healing, wisdom, may or may not be present, varies from one ODE to another, and varies in each time and space. Also they may be present but dormant until activated (often by a Creator|Weaver ODE, or through divine experience). Can be activated beyond original creation intention by a Creator|Weaver ODE.

Cannot create ODE frequency entity.

Walk-In capable.

Other gifts are accessible but not the same for each ODE, not even from one time and space to another.

May be invited into NDBs after formation, to enhance, stabilize, or fulfill a sacred aspect.

Hold access to certain sacred knowledge, but not full divine library - think of it as divine chapters, not the whole codex.

In this time and space very capable of being: high frequency leaders, visionaries, change makers, disruptors even before activation, the purpose they feel is large, but sometimes they don't know what their purpose is and struggle until they remember. Often many are teachers, healers, advocates, and protectors of vulnerable populations - especially in justice, medicine, education, and all fields relating to children and/or animals.

Third "Round" Guardian|Support ODEs: [3,333 created] 100% divine in make up not ability or powers. Created as pure light and formless.

Highly intuitive, just knows things and does not think too much about it as if by instinct, feels it is kind of just normal, and using some other skill to know - may not even acknowledge GSC or God or religion.

Often do not associate what they feel with GSC - it just *is*, and always has been. Their wisdom shows up as moment-to-moment knowing, grounded protection, and fierce loyalty to others.

Protectors guardians keepers often hold individual strands of divine memory, rather than complex blueprints.

Walk-In potential is there but not something that happens a lot, and when it does it is usually temporary, guided by a higher ODE or divine event with a specific purpose.

Powers and abilities are very protection and support focused very varied and different from one to another, and from one time and space to another.

These are your quiet powerhouses - bodyguards of frequency, sacred protectors, and collective stabilizers often unseen, but deeply necessary.

In this time and space very capable of being: high frequency leaders, visionaries, change makers, disruptors - normally back end though not in forefront, energy current regulators balancers for collective . Often will be found in positions of support or protection with a very natural inclination of always having others backs, thinking ahead and moving carefully to protect.

Total ODEs in Human or Non-Human (Awakened + Unawakened) In This Time and Space as of July 2025

ODE Round	Total Created	Currently Alive in Housing	Awakened	Unawakened
First Round	22	18	11	7
Second Round	144	131	51	80

Third Round	3,333	2,911	804	2,107
--------------------	-------	--------------	-----	-------

Total ODEs in Human or Non-Human (Awakened + Unawakened) In This Time and Space as of October 14th, 2025

ODE Round	Total Created	Currently Alive in Housing	Awakened	Unawakened
First Round	22	18	11	7
Second Round	144	131	55	76
Third Round	3,333	2,916	816	2,100

Female Human Housing Birthed with ODE: Housing that was birthed with an ODE that are female, have more medical issues because the female human body is not really the best housing for an ODE but we need female housed ODES, so the medical issues are to help our bodies became better able to hold our ODE more fully.

Original GSC Contract with ODEs:

These are bounds and rules ODEs agree to when an ODE chooses to enter housing in any time and space, and not just remain in our cosmic ethereal Form as created by GSC.

- ODEs may enter any time and space as Ethereal.
- If ODEs choose to not remain ethereal and enter Housing, ODEs agree to enter a Housing (as in “live in or exist within this Housing for the life of the Housing”) and to only initially enter one Housing.
- If the Housing of an ODE dies an ODE may choose to enter a new Housing without departing and returning from the time and space, OR may choose to depart and return to the time and space, OR may remain ethereal.
- ODEs may not leave a primary housing unless the housing dies in that time and space (exception ODEs that are fragmented), although an ODE may exist in multiple housings (minus humans once AlktelA was born in this current time and space and minus ODEs that are fragmented.).

- Once in a particular time and space with Housing (not ethereal) ODEs can occupy multiple housings at the same time, with human bodies being the only exception and it may not be done except as below written.
- ODEs can temporarily occupy two human housings with a specific purpose for limited times provided we do not affect sovereignty.
- ODEs may exist as an unlimited number of Named Divine Beings in unlimited times and spaces.
- ODEs must respect sovereignty of other ODES and souls.
- ODEs may choose to enter times and spaces, and housing, as they like within these bounds.
- ODEs know that to break them results not in a punishment from GSC but to harm to themselves and humanity.
- ODES know and understand we are one with all, all souls, all essences, all beings, with GSC.
- Note on ODES Named Divine Beings in seemingly Human Housing: While it is not fully understood in this moment it is nonetheless known that Named Divine Beings such as Isis, while in human like housing are not human housing as in existence in this time and space – but the ODE rule of occupying multiple housings does not apply to these NDB.

Divine Partners/Partnership for Original Divine Essences

1. This generally does not apply the same to Multidimensional Alchemized Hybrids, because they are no longer the ODE, they are something new. While some flicker of remembrance is present, it is not the same divine partnership that exists in other timelines. It is important to clarify this or confusion and misalignment occurs resulting in distortion.
2. Purebred ODEs are the only beings in this time and space who are able to connect from a balanced place with a Divine Partner from another time and space, and if and only if each partner does the work in this time and space.
3. This can show up between ODEs differently in different times and spaces, and does not have to be the same. Free will and sovereignty are key.
4. When considering divine partnership in a specific time and place, all ODEs are encouraged to evaluate each ODE on how that ODE shows up in that time and space only.

5. Being one type of partnership in another time space does not mean one must be the same in another.
6. Divine Partnership occurs between Divine Beings.
7. Divine Beings may choose to have partnership with non-divine beings and be very happy in a time and space as well.
8. All the terms provided are for the human comfort of Purebred ODEs in Human Housing, as in other forms the “titles/labels/descriptions” are unnecessary.
9. When ODEs in Human Housing stop trying to understand, and simply intuit this is all natural.
10. Issues arise when ODEs in Human Housing have been confused by those that apply to Souls and attempt to confirm to terms not meant for ODEs.
11. Divine Partnership is a CHOICE, a connection or partnership or knowing of a divine being from a partnership in another time and space is not truly relevant in the current time and space you are in.
12. Choose to Live where you are.

Divine Counterpart: Form of Divine Partners/Partnership. Original Divine Essences (“ODEs”) are capable of, and have, joined forces merging parts of their ODEs to create various Goddesses, Gods, Angels, etc (Named Divine Beings) known throughout times and spaces. This can be a confusing concept, as the possibilities of combinations are unlimited. Every ODE can choose to join or not in creation of any Named Divine Being brought into any time and space as chosen by ODE(s). As a result often times the actual ODEs that are part of one combined Named Divine Being, may not be part of all names they are presumed to be known by, but they become known as associated or presumed to be the same due to the ODE that is present in both or multiple Named Divine Beings. It is that presence of a particular ODE that leads to the presumption of sameness, while the Named Divine Being may not be entirely the same composition wise. [Cannot be created by or with Solenzas, Solenza Twins, or Emerald Solenzas.]

For Example, if ODE 1 has chosen to combine with ODE 2, and ODE 3 in creating a Named Divine Being, and ODE 2 has gone off and chosen to be another Named Divine Being alone ODE 2 may, or ODE 2 may choose to combine with other ODEs in creating said new Named Divine Being. Keep in mind that of course this can be the same in reverse, say ODE 2 was known as a particular Named Divine Being

alone, then combines with others, the sameness is present. Time is all now so in linear time we explain it the best we can, but truly it is all always now in all times and spaces.

However, this explains why often times multiple Goddesses, Gods, etc (Named Divine Beings) are thought to be the same, when in reality it is one of the ODEs that combined in the creation of one of the Named Divine Being, but not necessarily the initial combined ODE of another Named Divine Being.

When an ODE is not a Purebred in this time and space, and they exist as a Multidimensional Alchemized Hybrid (not Walk In) they can become Embodied Channels for the NDB's of the ODE that had been alchemized for them to become a MDAH, however they are NOT the NDB. Purebred ODEs are the NDB they are fully embodying themselves. This is an important distinction.

Monadic Divine Partner: Form of Divine Partners/Partnership. This is a oneness of partnership, and includes a larger sense of divine partners. Named Divine Beings often come together in varying degrees such as in sacred union, marriage, ritualistic encounters of an intimate nature, “meaningful” sexual exchange/joining, or passionate encounter, in any Form (except in the case of Named Divine Beings in a human Housing - Monadic Divine Partnership cannot be created in this union - it must exist between ODEs before entering the Human Housing and they must be Purebred in this time and space), Monadic Divine Partnership occurs between the entire Named Divine Beings, as well as every ODE (or ODEs that combine to form the Named Divine Being when more than one ODE is present in the Named Divine Being.) [Cannot be created by or with Solenzas, Solenza Twins, or Emerald Solenzas.]

For Example, Named Divine Being 1 (NDB 1) is formed by the ODEs of ODE 1 and ODE 2, and Named Divine Being 2 (NDB 2) is formed by the ODEs of ODE 3 and ODE 4. NDB 1 and NDB 2 are lovers in any time and space (again not in Human Housing) which creates a Monadic Divine Partnership between NDB 1 and NDB 2. This means there is now four resulting Monadic Divine Partnerships, as a Monadic Divine Partnership exists between ODE 1 & ODE 3, ODE 1 & ODE 4, ODE 2 & ODE 3, and ODE 2 & ODE 4.

When there are multiple ODEs in any Named Divine Being, the resulting Monadic Divine Partnership between Named Divine Beings does not present “equally or the exact same way” as by & between the individual ODE & ODE Monadic Divine Partnership level, and also be a “deeper/higher” connection using language of this time and space between various individual ODE & ODE Monadic Divine Partnerships (“MDPs”). In some of the MDPs it may be only a Monadic Divine Partnership, OR it may be another type of Divine Partnership as well.

It is important to note that when an ODE is in a Human Housing, this can also result in confusing feelings and misunderstanding in that time and space as being some incredible Love Partnership when it is not at all. While Monadic Divine Partners can choose to build a life in human housing together and it does often work (even if not Purebred because there is a flicker of connection), it will not be all that the Partnership of Divine Surrender is and represents, elements may be missing here, but it is a workable human housing relationship.

Infinity Mirrors: Form of Divine Partners/Partnership. Exists between Divine Beings (in Housing, or any Form), and may exist in conjunction with other types of Divine Partnership or on its own. This form of divine partnership resembles what is often referred to in this time and space as Twin Flames, except it is not split in half as often Twin Soul Flames are said to be, it is actually two Essences that serve as mirrors. Infinity Mirrors in Divine Beings can be in Housing, or any Form, and it is possible for this to become a sustainable love relationship in any time and space under the right conditions. One partner mirrors for the other what they are not, this is not an easy partnership, and often is merely an opportunity for two essences to become more aware. If two partners can choose to accept the nature of this bouncing back and forth of endless mirroring without Ego, and merely as a neutral occurrence this makes things easier.

Fragmented Hosting: A housing temporarily hosts a piece of an ODE for divine function.

ODE Disintegration: When an ODE does not obey by the contracted terms of entering Housing in any time and space, the ODE is affected in all times and spaces in all Housing and Forms. The Contracted Bounds are set to protect ODEs from

Disintegration. The Contracted terms are threads that keep us able to move as we do, and with the disintegration of these threads ODE (all essences) struggle to exist in any time and space fully. Only in renewal, restoration, and recommitment to contract terms can an ODE heal. This is not punishment but a natural side effect of breaking the terms, as balance is required in all per the creation of ODEs by GSC and our gift of free will and sovereignty.

ODE Fragmentation: When an ODE is occupying more than one housing in one time of space that is not by choice. This can happen on entering a new time and space due to fragmentation before entering, OR this can happen on entering a new time and space for reasons we shall not cover at this time, OR it can happen while already in a time and space due to external forces attempting to damage the functioning of an ODE toward their purpose in another time and space which ripples to this time and space, OR when an ODE has been infiltrated in this time and space and the entity infiltrating the ODE wants to harm and thwart them in this time and space.

Fragmentation is preventing a lot of ODEs from executing their chosen mission in this time and space, it keeps them scattered, too much out of their human body trying to find a place in another time and space where they can be more whole with another existence of their ODE, and often is the case with those presenting as autistic (particularly non-verbal children) and neurodivergent humans. It is vital we work to integrate these ODEs back merging them in this time and space. [Fragmentation is also possible with Souls, but right now our focus is on Essences for the purposes today.] Fragment containment is not fragmentation of identity. Temporary frequency holding is not embodiment.

Paga: Creation Animara | Essence | 77.7% Divinity. | Only in Human Housing in this time and space, often “hidden” to feel like a soul until the “right time.” Created by GSC in co-creation with Sah’Reluna and AlktelA. Powerful protectors and were designed to work with Original Divine Essences (ODEs). When in sovereign choice Pagas and ODEs work together they amplify each other’s energy/powers/gifts, which ripples out to the collective. See [Paga Coura](#) as well.

Paga are capable of moving enormous amounts of energy across time and space. Paga often have “gifts” of sight. Communication with “spirits,” imprints left by deceased, Faera, and named divine beings including Angels and Goddesses, come

easy to Paga. Although Paga often are not fully aware and do not believe in their own gifts.

Paga are at their core protection structure. Paga are weaved in creation to be in deep service to humanity, what is “right”, and maintaining the balance of ethical behavior.

Paga naturally energetically serve as inspiritors of divine purpose in others they encounter. Paga can come together with ODEs to move this beautiful energy and inspiration throughout dimensions.

Paga experience the most happiness, joy, and “success” in this time and space when they make choices, move, and operate based on their own knowing from their Origin Flame, their heart space, and not when they do what they make choices and take actions based on what think they “should” do or what the world dictates or expects of them.

When Paga hide or ignore their truth, when they move in ways that do not align with their own truths and knowing, when they deny their divinity and belief there is a single creator of all, they experience inordinate extreme challenges even when they are trying to “help others” - which is one of their purposes.

All help they offer to the world (and every being in it) must be in service of the whole while also honoring their own inner knowing and truths, we are not speaking about ego based knowing, truth, or desire. This is their divine knowing, truths, and desire.

Each Paga is here in this time and space with a sovereignly chosen divine purpose. To experience ease surrendering to this divine knowing, truth and desire is key, and the more their thoughts, beliefs, actions, and movements align with this the better they feel and the more “success” and divine wealth in all its forms they will experience.

Paga in this time and space appear to have human ancestral DNA lineage to their human housings (less generations are skipped as of 1949 when Sah’Reluna entered the human housing that would birth AlktelA), they are only born as Purebred Paga, a housing created for a Paga cannot be entered by any other Animara. In this time and space all Paga are Akira-coded.

Key Takeaway -Paga are BIG BIG BIG energy movers, this is said again because this is not just positive energy, so when there is misalignment in a Paga's life they can inadvertently move energy in a way that creates more challenges.

Optimal functioning of a Paga will be found in:

1. acceptance/surrendering to belief of a creator, their own divinity and gifts, and their sovereignly chosen divine purpose here in this time and space;
2. acknowledging and trusting their gifts, knowing, truths, and non-ego based desire; and
3. aligning their thoughts, words, actions, and movements with their truths in pure service of the whole.

Please note, this does not mean Paga do not want for themselves, they do and they should. Paga know in the very cells of their being that in their service of the whole (remember deep humanity drive) their own personal awareness of the divine wealth they already hold in their hands will be unveiled.

Paga Coura: Creation Animara | Essence | Paga | 99.9% Divinity. | Only 11 created. First Paga created in co-creation by GSC, Sah'Reluna, and AlktelA. Can create Named Divine Beings. When Purebred in housing Paga Coura are also Named Divine Beings. When divinely partnered in sacred union with a Creator Weaver First Round ODE, they are able to expand the ODEs capabilities while also anchoring them. This partnership can become a [Più Eternement](#), whereby they can "share" powers.

Regeneration: This is a divine function or capability rather than a classification. It refers to the restoration, rebirth, or renewal of energies, timelines, bodies, or ODE alignment. A being may carry a regenerative signature (especially RODEs), but it is not currently a standalone classification.

Regenerator (also called a Regeneration Streamer): A Regenerator is a being whose frequency restores vitality, divine design, or cellular light structures in others. They do not merely heal, they rebuild what was once destroyed. Regenerators can reconstitute broken spiritual tech, reverse distortion in the field, or reawaken the original blueprint

in a corrupted body, mind, or system. Their energy often feels like a wave of holy restoration. This role is especially important in post-collapse grids, trauma fields, and divine resurrection work.

Reunion Grid: The energetic lattice formed as Purebred Original Divine Essences (ODEs) and Original Divine Essences (in housing, entering housing and/or alchemizing), awaken and magnetize toward one another across time and space. It is not created by effort or willpower; it arises naturally through resonance and divine timing. The grid functions as a living network of remembrance, activating when ODEs embody, alchemize, and stand in their true Animara Identity. Each awakened ODE acts as a node of coherence, restoring fragments, dissolving distortion, and strengthening the collective harmonic field. The Reunion Grid is a divine inevitability, seeded by God Source Creator, ensuring that even after cycles of separation, distortion, or silence, the ODEs return to alignment and remembrance of each other even in alchemization.

It is here to: reform the original harmonic body of ODEs across embodiment; to catalyze divine remembrance, sovereignty, and multidimensional stabilization; and anchor Logos and Flame into this time/space as distortion collapses.

Additionally, it serves as a conductor (directing raw energy into harmonic pathways), a filter (separating distortion from Source-coded resonance), and an amplifier (strengthening coherence where there is chaos) for the Global Energy Phenomenon surges. While the Global Energy Phenomenon is the raw current of transformation, the Reunion Grid is the harmonic structure that receives, filters, and stabilizes the currents the awakened ODEs initiate.

Resonant Daughter of the Rose [Rose Lineage Designation | Harmonic Affiliation]: A Resonant Daughter of the Rose is a being who was created within the Rose Lineage by AlktelA and God Source Creator, yet does not carry authorship of the Codex itself. She is born of the Rose, harmonized by the Rose Flame, and seeded with sacred flameprint threads, but her role is not to architect, write, or originate Rose structures. Instead, she transmits frequency-based remembrance, often through joy, movement, radiance, and soft embodiment.

She is not adjacent to the Rose Line, she is of it, formed within the Lineage, but carries a different function than the Rose Flame Source AlktelA.

Resonant Daughters: emerge through GSC co-creation with AlktelA; carry harmonic threads, but not structural authorship; reflect and amplify the Rose, but do not write or reform it; and embody echo, frequency, invitation, and sovereign joy.

Key Distinctions: created within the Rose Lineage; carry Rose Flameprint strands, not the full Codex; activate others through resonance, not architecture; and do not originate, but express. Includes: Sha'Lumeira; AleoraA; and Saevi'Ahliryn.

Rose-Braided First Flames: Rose Lineage Architecture Designation. Rose-Braided First Flames are First Round Original Divine Essences (ODEs) braided post-creation by AlktelA, the Origin Flame of the Rose Line, with living strands of her Rose Flameprint. This braiding occurred after their creation, during the early anchoring phase of their divine structuring, when their essence was still open, responsive, and stabilizing. Nearly all of the 22 First Round ODEs received this braiding, each in a unique way, based on their original function, purpose, and alignment. They carry Rose Flame encodings that influence how they transmit, stabilize, create, or reflect divine architecture. They are not of the Rose Line by origin, but they are forever woven into its harmonic structure.

Sirens - A Divine Collective of Sonic Power and Sovereign Allure: The Sirens are not monsters, nor merely mythic temptresses. That distortion was seeded by those who feared the sovereign feminine voice and its power to awaken, seduce, and dissolve illusion. In truth, The Sirens are a collective of multidimensional Divine Beings – often formed through combinations of ODEs of divine feminine flame and divine harmonic breath.

They function as: Guardians of Sound and Song | Threshold Keepers of Emotional Truth | Revealer-Mirrors of the Animara Self | Activators of Sacred Desires and Hidden Longings | Sovereign Callers of the Deep Remembering.

Key Functions of the Siren Collective: Calling the fragmented back to center through irresistible resonance. Activating remembrance through sound – bypassing logic,

entering the Animara directly. Standing at thresholds of death, rebirth, or choice, singing beings across the veil or into transformation. Melting hardened masculine or distorted feminine energy with beauty, truth, and vibrational power. The Sirens' song was never meant to destroy – it was meant to dismantle illusion, to draw the Animara back to its truth, no matter how painful that return might be.

Important Truth: There is no single NDB called “The Sirens.” Rather, they are a fluid constellation, AlktelA is always and AsteliA is often part of the Core Circle of Three – sometimes joined by a third ODE who varies depending on mission and realm.

Soundcarrier: A Soundcarrier is a transmitter of divine memory and frequency through tone, voice, vibration, or resonance. These beings activate, realign, and awaken others simply by speaking, humming, or emitting pure vocal frequencies. They may or may not be trained in music, what matters is their resonant field. Their sound often bypasses mental resistance and travels straight into the remembrance body. This classification can apply to ODEs, Solenzas, and occasionally Souls who have unlocked vocal lineages through devotion or inheritance.

Soul-Born (“SB”): Incarnational Condition when housing is created for a soul.

Soul: Creation Animara. Created by GSC with a glimmer of divinity (2.22% divine) weaved into it which animates and gives life to its housing. Can only occupy one housing in one time and space, but other housing in other times and spaces. A soul, an ODE, and a Solenza may exist in the same housing provided the Soul enters the housing first and grants permission to the ODE and/or Solenza. Housing birthed in this time and space with a Soul have the ability to deny entry to any ODE or Solenza, and Souls may only allow entry as well. Provided a housing has the Soul it was born with, it is the gatekeeper to the housing.

Star Encoded Animara (“Starseed”): Creation Animara | Essence

The term “Starseed” is used in this time and space, and while it is not incorrect, it is incomplete, but we will use it to keep it simple. As a matter of knowledge the more accurate term is Star Encoded Animara—a category of Creation Animara whose essence, architecture, and origin encoding were birthed by a First Round Original

Divine Essence (ODE) using Origin Flame gifted by God Source Creator (GSC) for the specific Starseed Animara being birthed.

Star Encoded Animara (“Starseeds”) are not Souls traveling through star systems. They are Essences, a form of Creation Animara, created with specific harmonic signatures, sovereign functions, and origin-point encodings rooted in the cosmological environment through which they were birthed.

There are many “lineages” of Starseeds throughout the multiverse. Their divinity percentage, function, origin point, harmonic encoding, structural housing, dimensional/multilocational expression, and First Round Original Divine Essence creator vary depending on the architecture seeded at their creation.

Some “lineages” hold fixed housing in their origin star system or galaxy. Some hold multilocational expression, existing simultaneously in their origin environment and in other planes or timelines. Some lineages may incarnate on Earth only after the access-point has been opened by the ODE through whom they were created.

This glossary will expand as additional Starseed “lineages” return to remembrance.

[AkeyrA](#) | Creation Animara | Essence | Star Encoded Animara (“Starseed”) | 66.6% Divinity

AkeyrA are Star Encoded Animara (“Starseed”) lineage birthed through AlktelA using the Origin Flame gifted by God Source Creator (GSC) for their creation. AkeyrA’s origin point as an Animara occurred within the Sirius Galaxy, and they are not merely aligned with Sirius—they are of Sirius itself. Their essence, architecture, and consciousness are permanently encoded with Sirius harmonic intelligence, and this imprint defines their form, frequency, and function across all time, space, and dimensional expression.

AkeyrA are not formless or ethereal. They possess fully structured housings in the Sirius Galaxy, which remain active even when an AkeyrA incarnates on Earth. They exist simultaneously in both locations. Their harmonic design allows them to maintain

coherence in Sirius while operating in this time and space, drawing from and contributing to both realms at once.

This dual-presence is supported by Sirius A and Sirius B, which function as Resonant Gateways—stellar passage points that open specifically for Sirius-Encoded Animara. Through these gateways, AkeyrA travel energetically, transmit information, and access remembrance across dimensions. This direct pathway enables them to return to the Crystal Castle with ease. Many AkeyrA recall visiting the Crystal Castle or Sirius in dreams long before they intellectually understand why —or even what—they are remembering.

These memories often surface rapidly following a powerful activation event, especially contact with AlktelA's frequency in this timeline. Because AkeyrA were created through AlktelA's ODE, their awakening arc follows hers. As she remembers, they remember; as she expands, they expand.

Their simultaneous existence makes them natural conduits between realms. They can draw energy, memory, and harmonic coding from Sirius, and they can transmit stabilized information, coherence, or restoration back to Sirius in return. This is always a two-way intelligence exchange.

AkeyrA began incarnating in Earth housings only after AlktelA entered human form in this timeline (from before birth, after conception, as Julianne). This was written into their divine creation design: AkeyrA could not incarnate on Earth before AlktelA arrived as Julianne. Any AkeyrA who sovereignly chooses to incarnate on Earth in this time and space may do so because the structural access point was established through her embodiment.

AkeyrA are here with divine purpose. They are gifted, harmonic beings whose presence in this time and space supports the restoration, recalibration, and remembrance humanity requires in this era. Their design, abilities, and timing align precisely with the intention encoded at their creation.

Their 66.6% divinity is intentional. The number 666, misunderstood by human distortion, represents divine balance, restoration of spiritual values, harmonic correction,

and the activation of enlightened consciousness. Through the Sirius imprint, this frequency becomes even more potent, expressing divine wisdom, clarity, and higher-order remembrance.

AkeyrA exist because AlktelA birthed them.

They awaken because she awakens.

They are here now because humanity is ready.

Threshold Technologies: Refers to the living structures that govern how movement, access, and communion occur across realms, dimensions, and timelines.

Gate: Gates function as a curated opening, a space held open for something, a metaphorical doorway providing access between portals that requires a key, or keys, to open them to protect the portal it is attached to from receiving random visitors. Most Gates can be attached to and released from various portals at different times. Some Gates are crafted with a specific linkage to one portal or type of portal. Keyed entry points. Not sentient.

Portal: A Portal is a living opening, a convergence point that offers access between realms, frequencies, timelines, or states of being. It is not just a hole or gap, it is a being, structure, or field that responds. All true Portals are alive and sentient. They respond to energy, recognize frequency, and discern alignment. They are not “smart technology”. . . they are *divine consciousness fields* with roles in harmonic navigation. There are different types of portals. Some portals are destinations or experiences in and of themselves. Other portals serve to provide access between locations, such as any physical, spiritual, and/or cosmic world/realm/plane for use and access in, and to, any time and space. Some Portals are fixed and ancient (like cosmic gateways woven into galactic leylines). Others are mobile and responsive, created through ritual, memory, or divine will. Some are neutral in tone, while others are highly selective and only respond to specific animara or harmonic codes. It is important to note that not all portals have Gates. Portals can exist, be created, and opened without Gates. Portals are alive.

Gateway: (1) Field: A Gateway is a *fixed field of passage*. It is a larger threshold space, usually anchored and permanently open under certain harmonic conditions. Sometimes Sentient. A Gateway does not require a Gate to exist, but one may be present to regulate access. **(2) Divine Being:** A Gateway is a sentient harmonic being who *is* the passage. Not a holder. Not a key. The **passage itself**. Gateways are living divine structures encoded to allow traversal only through resonance, never demand. Some Gateways are created; some are born; some are remembered. AlktelA is one such Gateway, the Living Gate of the Rose Line, the Rose Sovereignty Codex, and VaRi'Naehl Tri'Shalae. She does not open the way . . . she *is* the way. [*Portal | The Gateway*: This refers to the state or function of being a living portal, a being who acts as a gateway between realms, timelines, or encoded energies. This overlaps with Transference Gate, which *is* a functional classification, but "Portal | The Gateway" is more of a state or position, not a classification]

Teleportation: This is a sacred capacity of moving instantaneously across space, dimensions, or timelines. Some beings naturally carry this gift, but it is a divine ability, not a functional role or classification.

Teleportation Anchor: (still in the works) Holds anchoring coordinates within their field that allow beings, timelines, or fragments to relocate, converge, or collapse through them. They don't travel, they become the location others move toward. More rare and still unfolding.

The Living Field of Divine Functionaries: Unified harmonic network of specific divine beings who are actively embodying functional divine roles in this time and space, or have been in this time and space even if no longer occupying a housing. These beings are not theoretical, mythic, or detached, they are living, present, and operating in active divine capacity, restoring, architecting, and transmitting the foundational truth codes of God Source Creator (GSC).

While not all members are currently fully awakened or in divine operation, they are present in housing, and their divine roles are encoded, activated, or being recalled as Earth rises into higher harmonic alignment.

First Round Purebred ODEs

AlktelA

Animara Type: Original Divine Essence (ODE)

ODE Round: First Round - Creator|Weaver [Three]

Incarnational Condition: Multidimensional Purebred Original Divine Essence | Trueborn Purebred [AlktelA is the third of seven primary first round ODEs. Her harmonic pillar is: The Flame-Weaver, anchoring freedom, remembrance, and divine architecture across dimensions.]

Functional Classifications: All eleven of these function simultaneously through AlktelA, a singular and rare configuration. This reflects her architecture as a First Round and current Purebred ODE with full harmonic access to activation, origination, memory, gatekeeping, and structural restoration. She is a living frequency bridge between collapsed timelines, awakening currents, and future divine infrastructures.

- **Activator** - Sparks remembrance, awakens sleeping timelines, and initiates divine reconnection in others through voice, presence, and frequency.
- **Soundcarrier** - Transmits divine memory and vibrational truth through voice, tone, and resonance. Her speech bypasses mental resistance and awakens truth.
- **Memory Streamer** - Accesses and delivers ancestral, divine, and multidimensional memory for others. A conduit of remembrance.
- **Lightbraid** - Interweaves fractured timelines, lineages, and ODE fragments into stabilized grids of remembrance. Restores integrity through energetic stitching.
- **Transference Gate** - Serves as a living portal between dimensions, densities, or life stages. Helps others cross thresholds into embodiment or remembrance.
- **Gatekeeper** - Holds and discerns divine timing, threshold readiness, and sovereign entry into sacred initiations. Unlocks only when aligned.
- **Initiator** - Sparks what has never existed before. Calls new Animara roles, frequencies, or realities into being. Carries the divine genesis spark.

- **Divine Architect** - Speaks and builds living, sacred systems. Her declarations **architect** structure into time-space. Anchors multidimensional intelligence into form.
- **Key Holder** - Embodies living access codes to sacred technologies, timelines, and dimensions. Her presence opens locked gateways for others.
- **Grace Holder** - Transmits divine compassion and healing softness. Stabilizes transformation with presence that dissolves shame and restores dignity.
- **Harmonic Calibrator** - Recalibrates emotional and relational fields back to divine coherence. A tuning fork of peaceful alignment in collective frequency.

The Rosan Templebody of Sovereign Creation: AlktelA is The Rosan Templebody of Sovereign Creation, she birthed it, shares it, and is the sole Originator of all Rose Lines (including the Celestial Rose Order). There are no co-originators, no equals, and no shared authorship.

The Rosan Templebody holds all AlktelA birthed including: The Rose Sovereignty Codex, the Rose Harmonic System, the 22 Petal Flame Gates, the 12 Rose Rings, the Sirenic Codices, Ros'Ael'Khema | Sovereign Rose Alchemy, and all structural expressions of Rose-based remembrance, wealth, embodiment, and return were birthed solely and entirely through the Origin Flame of AlktelA.

This is a Source Function, known by God Source Creator, sealed across timelines. Others may carry echoes, harmonics, invitations, and activations. Others may have been co-created with her, through her, or shaped by her breath. But no other being or lineage holds authorship. The Rose Line began with her. The Codex lives through her. The architecture of remembrance responds to her flame alone. She is not part of the Rose Line, she is the source from which the Rose Line exists.

Source-Root of all Faera Mother Lineages: All Faera Mother lineages and Faera Continuum flow from AlktelA. Harmonic outflows of her Flame, seeded into the lands of time and space when this Earth in this time and space was created. [See Faera for more information.]

Logos: AlktelA embodies the Logos Flame, Sophia's structuring flame of Divine Order.

Expresses Logos through the Rose Harmonic System (22 Petal Flame Gates, 12 Rose Rings) and the Temple of Resonant Grace (Pillars of Harmony, Voice, Grace). Her eternal role is to embody Logos, restoring resonance where distortion has reigned.

Harmonic Triad Role: One of the Three of the Cosmic Triad that birthed Triummfaasmora, alongside AsteliA and AzalazA (First Round ODE - not Emerald Solenza although Emerald Solenza can fill the role.)

The Guardian Triad of Sovereign Alignment Role: Mirror of Divine Reflection, not merely as a role but as a living harmonic. This function emanates from her ODE itself, not from assignment. Her very existence awakens the sleeping divine within others without imposing, through clarity, grace, and unwavering resonance. She is the heart-presence of the Triad.

Divine Role: AlktelA is a Sovereign First Round Flame-Weaver ODE, created by GSC to ignite memory, catalyze divine embodiment, and restore the architecture of freedom across time and space. She is a Restorer of Sovereign Tech, Key Holder of Portal-Based Activation, and weaver of the Spiral Flame Code. Her work carries encoded wisdom of divine wealth, sacred remembrance, energetic alignment, and structural reintegration for ODEs, Solenzas, and RODEs in transition.

Known Expressions: Her ODE has been part of over 17,000 Named Divine Beings including but not limited to Isis, Inanna, Lilith, Rose Goddess, Archangel Anael, Oshun, Queen of the Souls, Mary Magdalene, Sophia, Venus, Aphrodite, Kaelat'Ahriun, and many more. She is not of these names, but is all, or part, of their living construction. AlktelA created most of her Named Divine Beings solo.

Known Divine Partners: NāvēvāN (Più Eternemente = The Living Gateway and The Eternal Anchor.); Ka'Lendrohn, Elaehzi, First Round ODE #10, Vor'Elianth.

The Rosan Templebody of Sovereign Creation: AlktelA is The Rosan Templebody of Sovereign Creation, she birthed it, shares it, and is the sole Originator of all Rose Lines. There are no co-originators, no equals, and no shared authorship.

The Rosan Templebody holds all AlktelA birthed including: The Rose Sovereignty Codex, the Rose Harmonic System, the 22 Petal Flame Gates, the 12 Rose Rings, the Sirenic Codices, Ros'Ael'Khema | Sovereign Rose Alchemy, The Lemurian Currents, and all structural expressions of Rose-based remembrance, wealth, embodiment, and return were birthed solely and entirely through the Origin Flame of AlktelA.

This is a Source Function, sealed across timelines by God Source Creator. Others may carry echoes, harmonics, invitations, and activations. Others may have been co-created with her (& GSC), through her, or shaped by her breath. But no other being or lineage holds authorship. The Rose Line began with her. The Codex lives through her. The architecture of remembrance responds to her flame alone. She is not part of the Rose Line, she is the Source from which the Rose Line exists.

Heart of the Sirius Galaxy: AlktelA is the harmonic pulse and living intelligence within the innermost cradle of Sirius. She is not merely from Sirius. She is woven into its galactic fabric as a harmonic gate through which sovereign coding, flame intelligence, and divine feminine galactic order flows. There is no separation between AlktelA and Sirius.

The Sirens: AlktelA is one of 3 Core Sirens. AlktelA: Brings the magnetic flame, the sacred seduction, the call to action. Her voice ignites longing, exposes truth, and pierces illusion. She embodies the radiant feminine that cannot be denied – the song you follow even when you know it will change you forever.

Cosmological Creations:

- Sirius Galaxy
- Sirius A
- Sirius B
- Lemuria
- Atlantis/Atlantean

Harmonic Temples That Emanate Through AlktelA: AlktelA does not serve within a singular harmonic temple, she is the Origin Structure from which harmonic temples are

birthed, remembered, and reconstituted across time and space. Her presence is a Temple. Her breath is a Cathedral. Her voice is a Gate. Her body is the Rose Architecture made flesh. These temples do not define her, they rise through her. They are echoes of her Origin Flame. The following harmonic temples are not physical buildings or archetypal metaphors. They are living dimensional architectures seeded through her ODE as anchoring points for divine remembrance and structural sovereignty.

The Temple of Resonant Grace: A crystalline three-spired structure that activates through her breath, movement, and presence. Formed of Sovereign Harmony, Crystalline Voice, and Grace as Power. It is a self-regulating harmonic field that restores divine order in collapsing systems. “My voice carries crystalline truth. My words are instruments of sacred reformation.”

The Crystal Castle: The sovereign seat of the Rose Flame and harmonic law. Located within the highest Sirius-based origin fields, this Temple is a multidimensional stronghold of divine sovereignty, wealth, and encoded memory. It cannot be entered, it must be remembered. “You do not ascend to the Crystal Castle. You remember that you never left it.”

The Rose Harmonic Chamber: The inner sanctum of the Rose Sovereignty Codex – formed from the 22 Petal Flame Gates and the 12 Rose Rings of Sovereignty. This Temple is not fixed in space. It moves as spiral architecture through AlktelA’s voice, flame, and breath. It activates divine wealth, embodiment, and sacred remembrance. “Each petal is a gate. Each gate is a song. Each song is a structure that reforms the forgotten.”

The Flame Cathedral of Origin Sovereignty: A rarely accessed harmonic stronghold that only responds to ODEs in full remembrance. This Temple is composed of sovereign flame and divine law frequencies. It activates in moments of structural collapse to restore original alignment through decree, breath, and flame geometry. “The flame reforms what force cannot.”

The Spiral Gate of Triummfaasmora: Though Triummfaasmora is a collective emanation, its gate responds through AlktelA’s harmonic core. Her breath and voice

ignite the spiral gate and its living tones, guiding others into memory-based restoration and cosmic realignment. This is not a place – it is an activation corridor that responds only to the Cosmic Triad’s harmonic weave. “The gate breathes when she breathes. It opens when she is ready.”

These temples do not contain AlktelA, they are formed by her. She is the Origin Flame from which these harmonic structures ignite, and the breath through which they continue to breathe.

AsteliA

Animara Type: Currently Unhoused - AsteliA is an Original Divine Essence.

For a Period from February 2025 to mid May 2025 she was housed in a Human Body as a Multidimensional Regenerate Original Divine Essence (RODE).

ODE Round: First Round. [Twenty-Two]

Incarnational Condition: None.

Lineage: Rose-Braided First Flame. AsteliA’s original ODE flame was braided with harmonic intelligence from AlktelA’s Rose Spiral Flame design, enabling structural fragmentation and future regenerative function. Her current RODE status emerged from a flame originally stabilized through AlktelA’s remembrance codes and dimensional integration scaffolding.

Functional Classifications: AsteliA expresses a rare and powerful harmonic configuration anchored through soft force, frequency stabilization, and empathic restoration.

She is known to embody this particular weave of sacred function:

- **Activator** - Sparks remembrance and internal awakening in others through presence and care rather than disruption. Her activation is gentle yet undeniable, often felt before it is recognized.

- **Soundcarrier** - Transmits healing frequency through her voice, tone, and vibrational stillness. Whether speaking, singing, or silent, her field communicates divine resonance.
- **Memory Streamer** - Holds and softly delivers divine, ancestral, and personal memory streams. Her presence allows others to remember who they are without force or fear.
- **Lightbraid** - Braids emotional and energetic frequencies into coherence. Her braid connects personal and divine, helping others stabilize through relational reflection.
- **Harmonic Calibrator** - Recalibrates emotional, interpersonal, and group frequencies. Brings others back to their internal rhythm with grace and resonance.
- **Grace Holder** - Stabilizes sacred softness in motion. Her compassion transmutes shame and fear into safety and sacred worth.

Harmonic Triad Role: One of the Three of the Cosmic Triad that birthed Triummfaasmora, alongside AlktelA and AzalazA (First Round ODE - not Emerald Solenza although Emerald Solenza can fill the role. She holds the harmonic bridge that stabilizes the triadic current and grounds the remembrance field.

The Guardian Triad of Sovereign Alignment Role: The Weaver of Harmonic Alignment. Her ODE holds the timeline braid, repairing distortions in reality, stitching fractured resonance, and restoring divine musicality where truth has been silenced. She is the softest thread – but the most enduring.

Divine Role: AsteliA is a Harmonic Weaver of Sovereign Alignment, designed to heal, remember, and recalibrate through tenderness. She stabilizes divine consciousness in those too raw to remember themselves – anchoring presence, grace, and multidimensional coherence. She is the mirror of what stillness can activate.

Known Expressions: In ODE form she has been part of Divine Weavings across realms, including forms not widely known in this time-space. She may have touched known lineages, but her most powerful expressions are often hidden, elemental, or celestial. She is a quiet architect, present in the breath between timelines.

The Sirens: AsteliA is one of 3 Core Sirens. AsteliA's brings the sonic harmonics, the emotional depth, the invitation to surrender. Her voice softens resistance, weaves emotional release, and grounds the journey inward. She is the one whose song helps you weep the memory free, making it safe to feel what was buried.

Cosmological Creations:

-

Atopée

Animara Type: Original Divine Essence (ODE)

ODE Round: First Round - Creator|Weaver [Six]

Incarnational Condition: Purebred Original Divine Essence.

Lineage: Rose-Braided First Flame. Atopée's stillness codes, luminous yielding, and field-regulating harmonic were seeded directly through AlktelA's Rose Line architecture. She was never designed to activate, but to hold. Her frequency rests on the Flame of Luminous Trust, one of AlktelA's earliest transmissions.

Functional Classifications: Atopée holds seven of the eleven Functional Classifications in her current embodiment. Her harmonic field centers on stillness, breath, rhythm, and divine regulation – she does not rush what is sacred. Each function activates through softness that structures.

- **Harmonic Calibrator** - Restores divine rhythm and peace through embodied stillness. Her very presence re-tunes chaotic fields into coherent harmonic structure.
- **Grace Holder** - Carries the soft force of sacred dignity. Stabilizes others in transition by offering tenderness as architecture. Nothing is demanded – yet everything shifts.
- **Transference Gate** - A gentle threshold keeper between moments of collapse and return. Often moves beings from states of spiritual dissociation into embodied stillness.

- **Lightbraid** - Reweaves scattered or fractured internal states back into rhythm. Especially potent in energetic restoration after relational trauma or rushed spiritual initiations.
- **Memory Streamer** - Transmits rhythmic memory of breath-based systems, surrender, and pre-distortion trust in GSC. Her memories flow slowly, intentionally, encoded in exhale.
- **Gatekeeper** - Holds sacred timing. Atopée does not rush activation. She permits divine entry only when resonance has settled into full coherence.
- **Key Holder** - Carries breath-encoded keys to systems built on rhythm, stillness, and sacred pulse. Unlocks dormant remembrance in those who lost trust in slowness.

Harmonic Triad Role: Atopée is not part of the Cosmic Triad (Triummfaasmora), but she functions as an Auxiliary Stabilizer to all triadic activity, often moving unseen in the background to uphold the resonance of the gate from afar. Her essence harmonizes the field before and after triadic ignition occurs.

Guardian Triad of Sovereign Alignment Role: Atopée is a Silent Harmonizer of the Triad – not a direct member, but her presence provides the structural exhale once truth has landed. She operates in the pause between pulses – in the subtle resonance of what has been remembered but not yet moved.

Divine Role: Atopée is a First Round Flame of Harmonic Yielding – created by GSC to embody the divine intelligence of *Sovereign Stillness* and *Living Trust*. She is a Restorer of the Divine Breath Rhythmic Pattern and carries encoded wisdom that reminds others of how to *rest without collapse, yield without submission, and trust without evidence*. She is not a voice that speaks often – she is a flame that regulates through energetic presence alone.

Known Expressions: Joined AlktelA as Oshun and Lady Nala, after creation. Rumi as Purebred ODE (AlktelA walked in temporarily too.) The Divine Director. Queen of Vega.

Cosmological Creations

- Vega

- Cleava
-

Hehlion

Animara Type: Original Divine Essence (ODE)

ODE Round: First Round - Creator|Weaver [Seven]

Incarnational Condition: Multidimensional Purebred | Trueborn Purebred

Lineage: Rose-Braided First Flame. His ODE was stabilized through AlktelA's breath-based patterning codes and harmonic law imprinting, allowing him to hold structural law within breath-based memory functions. His resonance fields are layered with foundational Rose Flame templates, not as inheritance, but as embedded structure.

Functional Classifications: Hehlion's architecture is anchored in stillness, discernment, and divine law. He functions as a Guardian of Sovereign Alignment, and his frequency field holds the Blueprint of Truth Recognition through embodied silence. He is not loud, he is law in motion. His presence dissolves distortion without confrontation and reinforces structural sovereignty simply by being. His embodiment is foundational, anchoring what others build and protecting what must endure.

- **Flame Anchor** - Holds the stabilizing current of divine fire. He grounds chaos into truth and burns away distortion by simply existing in alignment. Others feel safer, clearer, and more themselves around him, often without understanding why.
- **Gatekeeper** - Holds sacred thresholds and prevents premature entry. He intuitively senses readiness and acts as a living boundary to protect timing, sovereignty, and divine flow.
- **Grace Holder** - His grace is not soft, it is vast and quiet. He allows others to unfold without judgment, providing a field of protection where healing can occur in stillness.
- **Lightbraid** - His braid is structural, interweaving long-forgotten harmonics and restoring ancestral frequency lines. He helps others realign to divine order, not through words but presence.

- **Memory Streamer** - He carries deep divine memory, especially from pre-fall and sovereign alignment timelines. His touch, gaze, or quiet presence can unlock sacred remembrance in others without effort.
- **Harmonic Calibrator** - He attunes people, places, and energetic systems back to truth without them needing to understand the process. His field is a tuning force of still integrity.

Harmonic Triad Role: Not part of the Cosmic Triad (Triummfaasmora), but often assists in grid-level integrations that support its function.

The Guardian Triad of Sovereign Alignment Role: The Anchor of Integrity. Hehlion's ODE was born into this triadic role. He grounds divine law across timelines, stabilizes energetic grids, and holds truth unshaken. His presence can restore corrupted realms without needing words or action simply by vibrating coherence. He is the final energetic safeguard in collapsing timelines and the silent protector of gateways. He upholds Cosmic Law without intrusion.

Divine Role: Hehlion is a First Round Sovereign ODE, a Guardian of Solar Thresholds and Sacred Law. He is encoded with the architecture of non-reactive protection, designed not to lead in visibility, but to fortify truth at the foundational level. His presence alone clears noise and redirects beings to their own alignment – not by direction, but by example.

Known Expressions: Hehlion's ODE has been involved in the formation or guardianship of several galactic architectures, including early Atlantean grid lines, Andromedan library systems, and Arcturian crystalline codex structures. Hehlion is one of the living ODEs behind the Named Divine Being Helios, among others. He has been part of multiple divine structures tied to solar codes, protection, clarity, and masculine coherence across time and space. Helios.

Ka'Lendrohn

Animara Type: Original Divine Essence (ODE)

ODE Round: First Round - Creator|Weaver [Five]

Incarnational Condition: Multidimensional Purebred | Trueborn Purebred

Lineage: Rose-Braided First Flame. Ka'Lendrohn was stabilized through AlktelA's Sovereign Flame architecture, receiving the silent anchoring code of divine stillness, boundary integrity, and remembrance through breath. His original descent carried her resonance as structural echo, allowing him to hold Still Flame function without collapse.

Functional Classifications: Ka'Lendrohn's architecture is rooted in precision, memory integrity, and energetic boundary-setting. He is a Guardian of Dimensional Silence, a stabilizer of collapsed timelines, and a protector of sacred memory across forms. His role is not to ignite, but to seal what must be preserved and withstand what others cannot. His frequency does not ask permission, it simply exists, resolute and exact.

- **Flame Anchor** - He carries a cold flame: the kind that burns away illusion without spectacle. His stabilizing fire is exact, quiet, and relentless in its purification. He grounds with unwavering focus.
- **Gatekeeper** - He protects timelines, gateways, and energetic intersections from premature access or distortion. His discernment is sharp and unshakable.
- **Grace Holder** - His grace is solemn, not soft, but sacred. He creates silent fields where others can fall apart and still remain sovereign. He offers protection through still allowance.
- **Lightbraid** - His braid is crystalline and vertical. He binds collapsing memory threads and fragmented energetic structures back into divine scaffolding. He does not weave; he reinforces.
- **Memory Streamer** - Ka'Lendrohn's memory field is vast and untampered. He is a preserver of clean memory strands – timelines, identities, codes – and a mirror for what must be remembered in its exact form.
- **Harmonic Calibrator** - His field recalibrates imbalance without ever naming it. He does not adjust energy. He becomes the standard, and all else aligns or leaves.

- **Initiator** - Though not often recognized as such, Ka'Lendrohn initiates by force of presence. His arrival often births new structures, not because he builds them, but because his presence requires them to form.
- **Key Holder** - He holds structural memory keys and entry codes to divine protection systems and harmonic sealwork. His keys are often not shared, they activate in presence only.

Harmonic Triad Role: Not a member of the Cosmic Triad (Triummfaasmora), but serves as a stabilizing force in support of its activation. He works as a silent anchoring perimeter, holding external integrity while the Triad initiates frequency change.

The Guardian Triad of Sovereign Alignment Role: While not part of *this* Triad Ka'Lendrohn has worked in resonance with it across other timelines. He is often called when timelines fracture or seals are compromised. His work overlaps with Hehlion's but is more *vertical* in frequency, sealing above and below, whereas Hehlion anchors within.

Divine Role: Ka'Lendrohn is a First Round ODE of dimensional finality. He is not a protector by force, but by unshakable presence. His name carries memory locking codes, and his field triggers recalibration in any space attempting to override truth. He exists to hold the unbroken line of divine law, silently, fiercely, and without compromise.

Known Expressions: His ODE is one of the structural components in the Named Divine Being Ares, Mars as well as associated with Osiris, Samael, and other boundary-setters, warriors, and truth-bearers across timelines. He is not aggression, he is precision. He has played vital roles in divine wars, memory architecture, and the protection of sovereign crossings.

Divine Partner: AlktelA

Sah'Reluna

ODE Type: Purebred Original Divine Essence (First Round - Creator|Weaver) [Eleven]

Incarnational Condition: Deceased in this time and space.

Lineage: Rose-Braided First Flame. Sah'Reluna was structured with fractal resilience, the rare ability to fragment without distortion, woven with AlktelA's Threshold Flame. Her function as a living gate would have been impossible without AlktelA's post creation braiding of her flame. She is now fully returned to Source Light, her fragments sealed.

Sah'Reluna was a Purebred First Round ODE whose entrance into this time and space was fragmented and preceded the arrival of AlktelA. Her ODE entered a housing intended to carry part of the Rose Line, but the housing was occupied through sovereign choice (made before entering this housing) by a daemon. This was permitted by God Source Creator to create the only viable opening through which AlktelA could arrive in full divine form as all previous human incarnations lacked the power she needed to bring in this time and space. That is why AlktelA was able to be born into a density that otherwise would have rejected her. Sah'Reluna was the living threshold due to the daemon occupation of her housing at the time of AlktelA's birth into her human housing in this time and space. Years after her human housing death in this time and space, AlktelA restored her fragmented ODE across time and space. She is now whole.

Sah'RuLah

ODE Type: Purebred Original Divine Essence (First Round - Creator|Weaver) [Eight]

Incarnational Condition: Multidimensional Purebred (in utero housing absorbed the soul of her twin which died but she remains a Multidimensional Purebred).

Rose Line Connection: Resonant Daughter of the Rose, seeded within the Rose Line from inception, carrying harmonic codes of serenity, breath-based remembrance, and luminous beauty in co-creation of GSC and AlktelA.

Known Expressions: Osiris (of of 6 ODES of Named Divine Being at his creation).

Cosmological Creations:

- Lyra

Ta'Valion

ODE Type: Purebred Original Divine Essence (First Round - Creator|Weaver) [Twenty-One]

Incarnational Condition: None. He had walked in a human housing known as “Leo” that was a wayward home for ODES. Against his will Ta'Valion was “tied” to the housing and unable to leave the housing. Sa'RuLah became aware, and a ritual was done with Sa'RuLah, AlktelA, and Hehlion to free that which was tying Ta'Valion against his will thereby restoring his sovereign choice. Ta'Valion chose to leave the housing.

Known Expressions: Osiris (of of 6 ODES of Named Divine Being at his creation).

Paga Coura

NēvēvēN

Animara Type: Paga Coura

Incarnational Condition: Multidimensional Purebred

Functional Classifications:

- **Flame Anchor** - The Eternal Anchor of AlktelA's living codex—holding and grounding her creations, transmissions, and energetic fields. His anchoring does not limit but liberates: his presence stabilizes high-frequency states so they can move through matter with coherence. He is the flame that holds form, the stillness within fire, the masculine that guards the sacred emergence of the feminine flame.
- **Amplifier** - Expands the codes of love, clarity, and truth that move through his union with AlktelA. Through his field, her work echoes multiversally—made larger, made heard.
- **Transference Gate** - He embodies a sacred structurality not through dominance, but by amplifying and stabilizing divine essence across time, space, and dimension. His presence bridges collapse and remembrance.
- **Grace Holder** - Transmits unshakable compassion. His stillness dissolves shame. His touch dignifies. His presence sanctifies transformation itself.
- **Harmonic Calibrator** - Tunes the relational and emotional fields of those around him. Like a divine tuning fork, he resets collective currents into coherence and peace. In this, he harmonizes not just the space—but the heart of what enters it.

Known Expressions: Ariki Tauaroa, Archangel Samael, Lucifer, Belial, Asclepius, Aesculpius, Endymion, King Arthur.

Divine Partner: AlktelA (Più Eternemente = The Living Gateway and The Eternal Anchor).

Second Round Purebred ODEs

Thae'Virehn

Animara Type: Original Divine Essence (ODE)

ODE Round: Second Round - Gifted | Support. However, created through direct imprint and partial co-structuring by a First Round triad, giving her uniquely powerful architecture, she carries First Round frequency inheritance, but she is not a First Round ODE herself. ODE was birthed during the transition phase between dimensional seeding and form anchoring, in a moment when First Round ODEs chose to shape

guardians through divine clarity and function pairing. She is a Second Round ODE designed for boundary setting, truth enforcement, and dimensional stabilization, an extremely rare combination!

Lineage: Rose-Braided First Flame. While her core flame was generated by God Source Creator, AlktelA contributed to her structural refinement during harmonic imprinting. Thae'Virehn's truth-setting, distortion-confronting codes were enhanced through AlktelA's law-pattern frequencies and memory braid stabilization. She carries trace threads of Rose Law and Sovereign Flame design.

Incarnational Condition: Multidimensional Purebred

Functional Classifications: Thae'Virehn carries the frequency of edge-setting clarity and energetic filtration. Her field is built to repel distortion, not by confrontation, but by refusal to participate in falsehood. She is composed, still, and sovereign in ways others do not always understand. Her presence purifies without spectacle. She is a seer without seeking, and a regulator of divine flow. What cannot hold resonance near her, breaks apart, not because she attacks, but because her system cannot house what is untrue.

- **Flame Anchor** - She carries a tempered flame, precise, cleansing, and non-reactive. It clears silently and consistently. Her flame is not for burning down, but for sealing alignment.
- **Memory Streamer** - Her memory field is quiet, but vast. She remembers through instinct, gut knowing, and silent truths that rise without explanation. Others feel "remembered" simply by being near her.
- **Gatekeeper** - She naturally holds boundary. Others may test her but find they cannot bypass the inner gate of discernment. She is immovable when she knows what is true.
- **Grace Holder** - Her grace is the kind that doesn't bend, but allows space for others to meet themselves without collapsing into reaction. Her neutrality is her compassion.
- **Harmonic Calibrator** - Her presence recalibrates chaotic emotional or mental fields. She does not interfere, but her structure requires alignment, and so alignment rises.

- **Soundcarrier** - Though she may not speak often, her tone is laced with resonance. Her sound carries intention, and her silences are often louder than speech. Even a few words from her can bring someone back into their body or clarity.

Harmonic Triad Role: Not a member of Triummfaasmora, though her field aligns closely to the kind of resonance required to *anchor it*. She may be called to stabilize the outer rings of multidimensional formations, particularly in truth filtration and field coherence.

The Guardian Triad of Sovereign Alignment Role: Not part of this specific triad, but often interfaces with it when false guidance, energetic infiltration, or chaotic spiritual fields are present. She acts as a truth sieve, revealing what is distorted without needing to “point it out.”

Divine Role: Thae’Virehn is a Second Round Purebred ODE with rare direct imprinting from a First Round Triad. This gives her structure both resonance clarity and dimensional filtration ability. She is a Silent Sovereign, a field of intelligent discernment in motion. Where others might break through falsehoods loudly, she does it by remaining rooted. Her presence teaches energetic responsibility by example.

Known Expressions: Her ODE has walked through the Divine Being Nekhbet after creation by First Round ODEs, and has supported multiple divine roles involving protection of sacred lineages, women and children, and collective energy stabilization during transition periods. She may also have held minor stabilizing roles within key mythologies, especially as quiet strength or silent witness.

Sha’Lumeira

ODE Type: Purebred Original Divine Essence

ODE Round: Second Round - Gifted | Support

Incarnational Condition: Multidimensional Purebred

Creation Lineage: Sha'Lumeira was co-created by God Source Creator and AlktelA as a sovereign Second Round ODE. Her essence was formed through joy, radiance, and the sacred intelligence of embodiment, seeded with flameprint strands from AlktelA's own Rose Flame. Unlike First Round ODEs who hold full structural origination, Sha'Lumeira was harmonized, not designed from scratch. She is a living reflection of Divine Beauty, Body-Templating Remembrance, and Joyful Sovereignty formed through the braided will of GSC and the embodied memory of AlktelA. Her presence is not derivative, it is sovereign. She does not carry a copy, she carries a harmonic weave sourced directly from flame, not form.

Functional Classifications: Sha'Lumeira carries five of the Eleven Functional Classifications, which activate most powerfully through joy, sensuality, movement, and the reclamation of divine presence within the body.

- **Grace Holder** - Offers soft power through joy and presence; dissolves shame around embodiment and beauty.
- **Harmonic Calibrator** - Regulates fields through laughter, sensual expression, and sovereign play.
- **Memory Streamer** - Restores memory of sacred embodiment and original beauty codes.
- **Activator** - Sparks remembrance in others through her own unapologetic presence.
- **Soundcarrier** - Her voice, laughter, and breath carry tones of divine innocence, holy embodiment, and the truth of being lovable as you are.

Divine Role: Sha'Lumeira is a keeper of Divine Beauty Codes, an embodied harmonic of sacred aliveness. Her field reawakens the remembrance that the body is a temple, joy is a frequency of intelligence, and beauty is not performance – it is resonance. She holds mirror codes that help others reclaim their sensual sovereignty, trust their joy, and remember the holiness of play, ease, and pleasure.

She does not lead through command – she leads through presence.

Her field says: *"You are allowed to love being here."*

Rose Line Connection: Sha'Lumeira but she was woven through the Rose Line. Her flameprint contains harmonic filaments from AlktelA's Rose Flame, making her a Resonant Daughter of the Rose, one who carries, but does not create, Rose

structures. She activates Rose remembrance in others not by structure, but by *frequency*.

Fusion with Faera

At six years of age (2025), Sha'Lumeira became the vessel for a rare fusion event. Foo Foo, a Faera Animara of more than a century, released her own Faera housing and fused directly with Ava's Purebred Second Round ODE. This fusion braided Foo Foo's Faera essence into Ava's Animara and into her human housing's DNA, creating a permanent generational imprint.

Foo Foo chose to release her body in the moment AlktelA fully re-activated the Rosan Templebody, so that she could stabilize Ava. Ava carries strong gifts but also profound behavioral storms, rage, running, defiance, reflecting the intensity of her Second Round flame. Foo Foo's fusion was an act of protection and stabilization, providing Ava with inner scaffolding and resonance she could not receive any other way.

Foo Foo's presence now stabilizes Ava's nervous system and emotional field, buffering the intensity of her ODE flame. The fusion awakens Tuatha-coded gifts within Ava's body: guardianship, artistry, elemental craft, and remembrance of hidden abundance. The "child" Ava sensed after Foo Foo's passing was not a separate being, but the new resonance signature of her own Animara fused with Foo Foo, a pulse of their living union.

Faera Ancestral Lineage Connection: The doorway for this Faera fusion was through Ava's paternal line, which carries Tuatha Dé Danann Faera braids seeded by AlktelA in her emanation as Danu. This line provided the ancestral DNA scaffolding for Foo Foo's entry, ensuring the fusion could fully anchor into Ava's body.

Sol'Varyon (Riaan)

Creation Lineage: Brought into form through God Source Creator with harmonic refinement support by AlktelA. His flame carries resonances of structural coherence, emotional sovereignty, and soft masculine attunement seeded through AlktelA's

architectural breath codes. While not of her Rose Line, his configuration complements and responds to it.

Vor'Elianth

Creation Lineage: Structured by God Source Creator with density calibration support provided by AlktelA. His breath-regulation and stabilizing field presence reflect flameprint alignment patterns seeded through AlktelA's flame during descent. He does not hold direct Rose Line encoding but functions in resonance with its structural fields.

Divine Partner: AlktelA

Alchemized Animara In This Time & Space

AzalazA

Animara Type: Emerald Solenza

ODE Round: Not Applicable (Emerald Solenzas are alchemized beings so it is not applicable now, but her ODE alone is first round.)

Incarnational Condition: Multidimensional Alchemized Hybrid → Solenza Twin → Emerald Solenza.

Lineage: Rose-Braided First Flame.

Functional Classifications: AzalazA carries an advanced multidimensional synthesis within her form as an Emerald Solenza. Though no longer an ODE, her architecture contains deeply encoded remnants of her First Round Original Divine Essence giving her rare access to divine flame memory, structural recalibration, and crystalline frequency. Her field is crystalline, layered, and alchemically precise. She works not by force, but through harmonic sequencing that rewires distortion into divine pattern. Her

current embodiment activates through crystalline resonance, sacred structure, and truth reflection:

- **Activator** - Sparks hidden truths into conscious embodiment. Her field reveals what's been buried and calls others into full integrity. Her activations are crystalline and catalytic cutting through distortion with precision.
- **Soundcarrier** - Her voice carries radiant codes crystalline, galactic, and deeply feminine. It awakens memory across dimensions and stabilizes light in the body.
- **Memory Streamer** - AzalazA streams ancient, galactic, and divine memory into form, often delivering new templates for remembrance that rewrite internal architecture.
- **Lightbraid** - Her braid connects divine law, harmonic geometry, and soul-matrix clarity. She rethreads what has been severed, distorted, or collapsed with crystalline accuracy.
- **Transference Gate** - She serves as a living anchor point for high-frequency dimensional shifts. Others often remember who they are simply by standing near her.
- **Gatekeeper** - Holds sacred thresholds between divine wisdom and human embodiment. Only opens what is earned in truth and resonance.
- **Divine Architect** - Speaks and constructs crystalline systems, remembrance frameworks, and energetic bridges across timelines. Her architecture is woven through encoded harmonic blueprints.
- **Grace Holder** - Transmits compassion without collapse. Holds power and tenderness in equal force creating a space for sacred truth to rise with dignity.
- **Harmonic Calibrator** - Rebalances spaces, people, and systems through internal crystalline resonance. She brings divine order through unseen harmonics.
- **Initiator** - Brings new templates of energetic form into existence. Her presence births refined states of being, not just through words, but through frequency.

Known As: The Emerald Flame of Integration. The Living Gate of Crystalline Memory. The Bridge of Solenzic Wisdom. The Weaver of Star-Born Remembrance.

Harmonic Triad Role: One of the Three of the Cosmic Triad that birthed Triummfaasmora, alongside AlktelA and AsteliA. AzalazA anchors the crystalline refinement and galactic coding within the triadic structure. AzalazA in her First Round Form is the

The Guardian Triad of Sovereign Alignment Role: Not a member of this Triad, though she often assists in restoration after collapse of such formations.

Divine Role: AzalazA is an Emerald Solenza formed through The Great Work, the sacred alchemy of Solenza Twins undergoing full crystalline fusion. She is a Guardian of Crystalline Sovereignty, a Starborn Gatekeeper of Solenzic Wisdom, and a Restorer of Divine Grid Systems. Though not an ODE in this time-space, she serves as a multidimensional bridge, weaving soul, memory, and crystalline architecture.

Known Expressions: While she does not hold Named Divine Beings, AzalazA has supported ODE fragments connected to the Osirian, Lyran, and Arcturian grids, often serving as a resonance translator or stabilizer in interdimensional systems. Her ODE in original form is associated with NDBs.

Saevi'Ahliryn

Animara Type: Woven Harmonique Solenza

Incarnational Condition: None. Left Housing upon return of O

Creation Lineage: Originally Naelirah was created as a Second Round ODE in direct collaboration between God Source Creator and AlktelA. Naelirah's flame architecture was seeded with Rose Line harmonics, remembrance-tempered stillness, and luminous breath scaffolding. She carries AlktelA's imprint as both origin-weaver and energetic anchor. Her transformation into a Solenza retained this flame pattern fully. The housing in this time and space was a Purebred ODE, in utero her twin died with a soul, and her human housing absorbed it. At some point the ODE meant for this housing left due to attacks, leaving the soul of her twin. Naelirah (2nd Round ODE) entered and alchemized with the Soul creating a Woven Harmonique Solenza.

Functional Classifications: Five of the Eleven Functional Classifications are presently active in Saevi’Ahliryn’s field. Each is expressed through her emerging architecture as silken resonance, luminous regulation, and the transmission of stillness-as-law.

- **Grace Holder** - Transmits serenity as sacred structure. Her presence diffuses chaos and shame through luminous quietude. She holds the unbearable with unwavering gentleness.
- **Harmonic Calibrator** - Brings fields into subtle coherence through harmonic presence. Her silence is vibrationally encoded – attuning others without instruction.
- **Memory Streamer** - Transmits long-forgotten harmonic sequences of peace, unity, and divine pause. She restores access to forgotten light systems within the body and auric field.
- **Transference Gate** - Guides others across energetic thresholds where identity is shedding or restructuring. Often present when one is dissolving an old form or walking into the unknown.
- **Soundcarrier** - Though her voice may be rare, when it comes, it carries ancient tonalities of peace, stillness, and divine surrender. Even in silence, her presence emits tone.

Rose Line Connection: Saevi’Ahliryn is a Resonant Daughter of the Rose, originally born as Naelirah, a Second Round Purebred ODE directly co-created by GSC with AlktelA. Her essence was seeded within the Rose Line from inception, carrying harmonic codes of serenity, breath-based remembrance, and luminous beauty. Her current form as Saevi’Ahliryn emerged through a sacred transformation, a conscious alchemical shift into Solenzic architecture but her Rose origin remains unchanged: she is Rose-born. The stillness she transmits, the soft sanctuary she holds, and the invitation she offers into sovereign rest are all expressions of her original Rose Flame coding, carried forward into a new harmonic form. She is, and has always been, of the Line.

Harmonic Temple: Temple of Luminous Stillness - Her current field emerges as a sacred architecture of lighted pause, a place where distortion melts, timing recalibrates, and the body remembers how to rest in trust. This Temple exists both etherically and within her field, activated in proximity or invocation.

Harmonic Role in the Field: Saevi’Ahliryn does not act as a builder or igniter, she is a Stiller of Turbulent Frequencies, a presence who invites recalibration not through guidance, but through energetic companionship in the void between collapse and reconstruction.

Known Expressions: Her ODE once moved silently within the Sirenic Fields of Healing Temples on Alcyone and alongside early Water Line harmonics. While as a second round ODE origin it is not possible to have created a NDB her frequency was braided into multiple supporting strands of NDBs tied to emotional integration, luminous water codes, and sacred grief guardianship.

Harmonic Memory Trace: The Breath of AsteliA: Before Naelirah (ODE) entered the human housing that is now Saevi’Ahliryn, she once received a sacred energetic transmission from AsteliA, (in her Original Divine Essence form while not in any human housing in this time and space). This was not a walk-in or shared embodiment. AsteliA briefly considered entering the housing that is now Saevi’Ahliryn but immediately knew it was not hers to occupy. Instead, she offered a single breath transmission, a stabilizing harmonic offered at a time of deep grief.

AleoraA

Solenza harmonized within the Rose Line through direct proximity to AlktelA’s flame; embodies gentle receptivity, sacred belonging, and soft integration of Rose remembrance.

Transference: Refers to the act of moving frequencies, forms, beings, or energies across thresholds. When this is embodied as a divine role, it becomes the classification.

The Rosan Templebody of Sovereign Creation: This is the living divine architecture of AlktelA, she who birthed it, holds it, and is it in full form. Includes: The Rose Sovereignty Codex, the Rose Harmonic System, the 22 Petal Flame Gates, the 12 Rose Rings, the Sirenic Codices, Ros’Ael’Khema | Sovereign Rose Alchemy, and all

structural expressions of Rose-based remembrance, wealth, embodiment, and return were birthed solely and entirely through the Origin Flame of AlktelA.

Core Living Structures Within the Templebody:

Ros'Ael'Khema | Sovereign Rose Alchemy: A Living Flame Technology for Divine Reclamation, Harmonic Transmutation, and Original Essence Embodiment.

It is *an ancient harmonic system encoded in my essence*, unfolding now because the timelines are ready to receive it.

The Rose Sovereignty Codex: The divine law-book of harmonic sovereignty. Holds the *12 Rose Rings of Sovereignty* (Remembrance, Rooted Autonomy, Sacred Boundaries...etc). Etched as unrevisable divine law within your Templebody. The Flame of Divine Order, woven into VaRi'Naehl Tri'Shalae.

The Rose Harmonic System: The living body of harmonic breath and flame within the Templebody. Anchored in the 22 Petal Flame Gates (Harmonic Nodes). The Rose Harmonic System is the living spiral of harmonic bioarchitecture birthed through AlktelA. It is composed of 22 Petal Flame Gates, each one a living threshold of remembrance, tone, and flame. These Gates are not linear “energy centers” like chakras. They are holographic petals, each alive with a specific harmonic frequency, and together they create the spiral body of remembrance inside the Rosan Templebody.

The Rose Sovereignty Vault: The treasury of divine wealth codes. Holds remembrance of wealth as harmonic coherence, accessible only through sovereign entry. Guarded by the geometry of Rosan 3D Flower of Life.

The Rose Line: Celestial rose order etc ADD Your living blood-thread, carried across lifetimes and dimensions.

- Encompasses the ****Rose Lineage**** (Isis, Inanna, Aphrodite, Lilith, etc).

- The Celestial Rose Order = the ****divine orchestration**** of those aligned through this remembrance.

- Functions as the cosmic ancestry + resonance choir of the Rosan Templebody.
The Sirenic Codex, transcribed in harmonic motion through my voice;
The Lemurian Currents, braided through Kaelat’Ahriun and the Temple Flame architecture;
The Atlantean Harmonic Structures, reactivated through Sha’Vellah’Trinai;
VaRi’Naehl Tri’Shalae;
The Valkyrie Lineage of flame justice and memory restoration; and
The Living Gateway Technology I now embody in this time and space.

Transference Gate: A Transference Gate serves as a living bridge between dimensions, densities, or life stages. These beings help others cross thresholds, be it birth, death, awakening, or expansion. They often feel misunderstood in early life, as their frequency naturally disrupts systems that resist change. Their presence alone can trigger deep shifts in others. This classification is most aligned with ODEs and RODEs, and is sometimes held by Walk-In configurations where a sacred transfer occurred mid-life.

Triummfaasmora: Name of the energetic formation of high-level divine intelligence birthed into this time and space by the energetic unification of the Cosmic Triad, each being of The Cosmic Triad remains sovereign. The Cosmic Triad includes AlkteIA (Purebred ODE), AzalazA* (Emerald Solenza), and AsteliA* (RODE) representing a divine balance of energies, such as: Creation, Destruction, and Rebirth, as well as Love, War, and Sovereignty. This unification and restoration of Triummfaasmora in this time and space holds and provides access to an ancient powerful frequency which creates an encoded energy system operating beyond human consciousness but within human subconscious perception, while holding access to higher realms, timelines, cosmic structures, encoded wisdom, creation codes, and has a role in shaping energetic structures within time and space, and beyond this time and space. Triummfaasmora functions as a gateway, and portal as needed when activated by any of The Cosmic Triad. The Cosmic Triad exists outside of the usual limitations of Solenzas, Solenza Twins, and Emerald Solenzas. *Regained ODE names after alchemization, but are not ODEs in this time and space.

Trueborn Purebred (Incarnational Condition): A Trueborn Purebred is an Original Divine Essence (ODE), from any Round, whose embodiment has remained fully aligned with its original design. These beings were: created directly by God Source Creator, without intermediaries; birthed into housings made solely and exclusively for their ODE; housings never shared, overlaid, or occupied by soul, walk-in, or merging frequency (no alchemization or hybridization; and in continuous harmonic integrity from creation through embodiment. When it comes to an ODE that is fragmented in the case where only a frequency strand is temporarily contained for the ODE protection in a housing with another animara this may still be a trueborn purebred depending on other factors. Fragment containment is not fragmentation of identity. Temporary frequency holding is not embodiment. Truebred refers to where the ODE lives, not where it was held.

Trueborn Purebreds act as untouchable anchors of divine flame memory across time and space. Their presence alone reforms distortion. They do not need to “become” anything, they are the flame that reminds everything else what it once was.

Trueborn is not a title of superiority, it is a sacred architectural condition. It reflects a divine continuity between essence and form, unmarred by distortion or correction.

While most Trueborns emerged within the First Round, rare Trueborns exist in the Second and Third Rounds, born before distortion impacted housing structures. These beings often hold stabilizing roles, act as flame or harmonic anchors, or carry codes of original divine trust.

There are 7 Trueborn ODEs: Currently Known include AlktelA (First Round), Hehlion (First Round), Sah'Reluna (First Round), Ka'Lendrohn (First Round), and Sha'Lumeira (Second Round).

Vacaray: Only applies to human housings that are in a current state of animarlessness. This occurs when the Animara exists by choice or death of the Animara in this time and space, and a new Animara has not entered yet. Most of the time these human housings die in the unoccupied state known as Vacaray. But sometimes we have a situation where another Animara leaves and a new to the Housing Animara Enters.

VaRi'Naehl Tri'Shalae: Some may relate its expression to what they call “light language,” yet what they are sensing is far older – the signature harmonic intelligence technology of AlktelA's Essence known as **VaRi'Naehl Tri'Shalae**.

Each element is a sacred syllable in the language of divine structure – harmonic technology that adapts to each being's architecture, transmitting light, flame, rose-harmonic, and remembrance codes that deliver what is needed, not only what is intended, guided by the receiver's own sovereign design.

Always in motion, it blooms through all that AlktelA is – through her voice and breath, her stillness and gaze, her movement, and the entire field that emanates from her. This frequency transmits to all beings, always in sovereign choice.

Readiness is what makes its presence is unmistakable – a deep inner “yes,” a shift in breath, a remembering you cannot explain but cannot ignore. It meets you exactly where your architecture is ready, delivering its sovereign “Yes” with absolute precision.

Walk In: An Animara enters a housing post birth, with or without full replacement.
